☒ Android

Detachable Self-Timer Remote

To remove the self-timer remote, slide it downwards from its slot.

Figure 1

Rechargeable Battery

Equipped with an Android micro-USB interface, the battery eliminates the need for direct charging. It can also be recharged using a standard mobile phone power bank.

Figure 2

Rotatable Clip Light

The clip light can rotate freely, allowing you to take photos from multiple angles, both horizontally and vertically.

Activating Quad Mode

The clip light can rotate freely, allowing you to take photos from multiple angles, both horizontally and vertically.

Stable Platform

The tripod provides a stable platform for photography, ensuring your photos are consistently sharp and clear, with no need for extra caution to avoid camera shake.

PTZ Panoramic°360 Function

Enjoy smooth, 360-degree panoramic imaging, capturing expansive views effortlessly.

Quad Mode

When the self-timer lever is switched to quad mode, ensure you open the bottom knob lock. Extend the four legs and then secure the knob. This allows the tripod to be stable.

How to Use

1. Startup:

Press and hold the camera button for 3 seconds to turn on the device. The indicator light will flash, signaling the start.

2. Bluetooth Connection:

Open your mobile phone's Bluetooth settings and search for "VIP". Select it to pair. The indicator light turns off once paired successfully.

3. Photographing:

With the remote control paired to your mobile phone, press the camera button to take photos. The indicator light flashes when a photo is taken.

4. Shutdown without Connection:

If the remote is not connected and idle, it will automatically turn off after about 5 minutes.

5. Connected Shutdown:

If the remote is paired but inactive, it will enter sleep mode after 10 minutes. It will then shut down if there's no operation for another 10 minutes.

6. Sleep:

In sleep mode, press the camera button to wake the remote.

7. Shutdown:

From either the powered on or sleep state, long press the camera button for 3 seconds to turn the device off. The indicator light will flash off and then shut down.

8. Back Connection Function:

The remote has a memory function for devices it has been paired with. When the phone's Bluetooth is activated, the remote will reconnect automatically with the previously paired device.

Product Parameters

Width of Compatible Mobile Phones: 120-65mm

Light Parameters

- Charging Time: Approximately 1 hour
- Service Time: Approximately 1 hour
- Light Gears: 9
- Color Temperature Range: 6500-2800K
- Battery Capacity: 55mAh

Remote Control Parameters

- Battery Model: 401020 Polymer (Rechargeable)
- Charging Voltage: 5V/1A
- Battery Capacity: 55mAh
- Charging Current: About 50mA
- Full Charge Time: About 60-30 minutes
- Bluetooth Version: 5.2
- Bluetooth Name: VIP

Troubleshooting: Failure of Remote Control to Connect

1. Enable Bluetooth on your mobile phone and remove any existing paired devices.
2. Restart your phone.
3. Turn the Bluetooth remote control off and on.
4. Restart the Bluetooth again.
5. Activate Bluetooth on your phone, turn on the remote control, and search for the VIP connection. Select 'Connect', and upon successful pairing, the interface should show "connecting" and then "connected". Note: If the devices connect quickly, this suggests a normal pairing. (Excitation is only required for the first connection—afterward, automatic reconnection should occur.)

For Android Phones: Remote Control Sound Adjustment and Focus Issues

1. Open the camera app to access the photography interface.
2. Navigate to camera settings by swiping left.
3. Locate the volume key function.
4. Assign the volume key to act as a shutter button; avoid setting it to zoom or focus.
5. Due to variations among mobile cameras, if additional adjustments are necessary, please configure them yourself.

Note: The remote control supports the video recording function of the mobile camera app but not live streaming apps.

Operating Method:

- Pair the Bluetooth remote control with your mobile phone.
- Open the camera on your phone or use another camera app.
- Press the remote control button to start recording video.
- Press again to stop recording.
- When connected, press the button to take pictures, indicated by flashing blue lights.

-Charging Indicator: The red light stays on during charging and turns off when fully charged.

Operating Modes:

- Remote Control (Effective Distance: 10m)
- Tripod Mode
- Handheld Mode
