Features

1. Employs UV light to lure flying insects such as mosquitoes and flies, enhancing effectiveness.
2. Features a high-voltage electric grid that efficiently kills insects upon contact.
3. Equipped with a protective outer grid to prevent accidental human contact with the electrified interior.
4. Includes a removable tray to collect and dispose of dead insects easily, ensuring hygiene.
5. Designed for easy cleaning and maintenance, ensuring long-term usability.
6. Operates quietly, minimizing disturbance to household activities.
7. Consumes low power, making it an economical alternative to traditional insect control methods.
8. Can be conveniently hung or placed on a flat surface to suit different spatial requirements.
9. Provides all-around coverage, maximizing the area of protection against insects.
10. Comes with a remote control for easy operation from a distance.
11. Its ultra-quiet design ensures it does not disrupt the environment.
12. Operates without the use of chemicals, making it safe for home and environmentally friendly.
13. Capable of covering up to 80 square meters, making it suitable for larger rooms.
14. Utilizes a 2400V grid to ensure effective killing of insects.
15. Features timer settings from 2 to 14 hours for flexible usage according to different needs.

Specifications

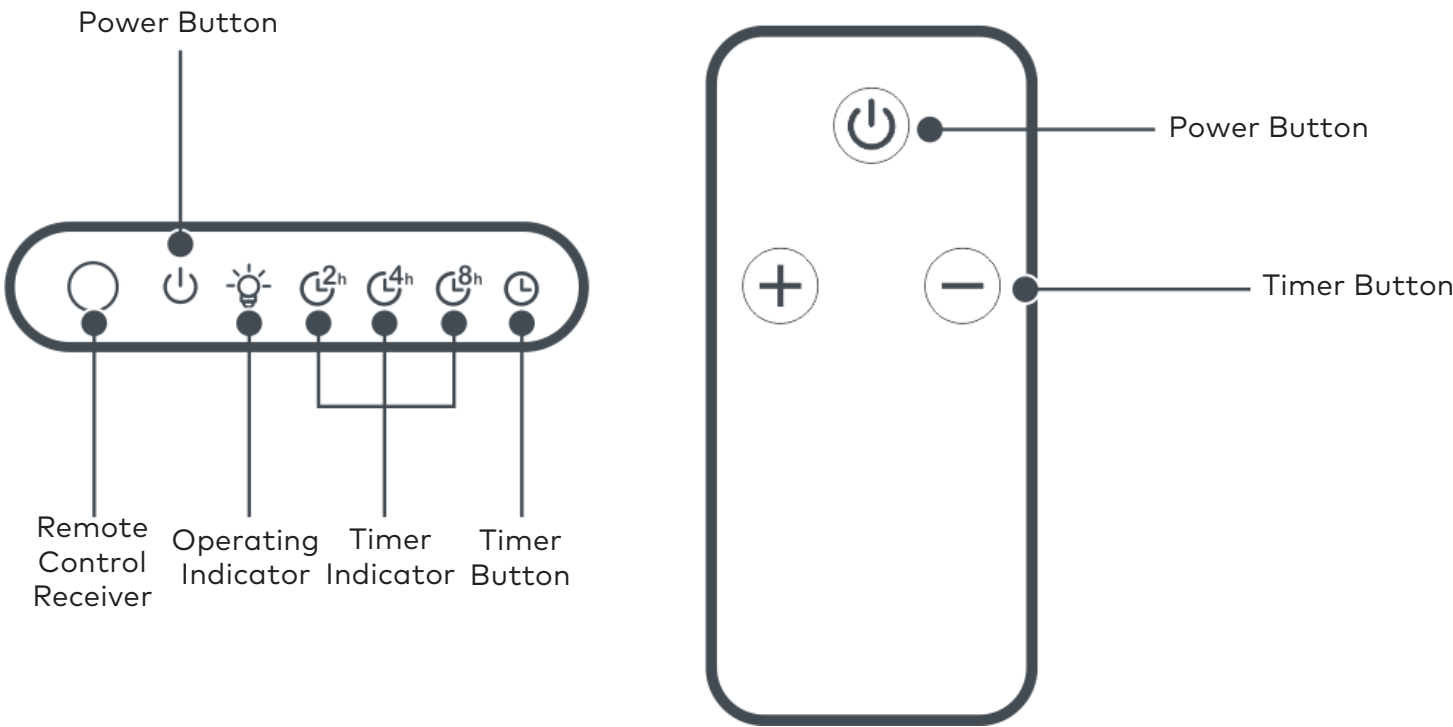

| | |
|--------------------|-------------------|
| Model No. | GL-IK30A |
| Material | ABS+Iron |
| Rated Power | 30W |
| Voltage | 220V-240V 60/50Hz |
| Light | UVA Light Bulb*2 |
| Light Power | 15W |
| Killing Voltage | 2000-2400V |
| Coverage Area | 80m |
| Power Cord | UK Plug |
| Cable Length | 1m |
| Product Dimensions | 190×100×529 mm |
| Product Weight | 1.46 Kg |

Product Overview

The insect killer attracts flying insects like flies, moths, mosquitoes, and other pests using black light. Electrified high-voltage metal grids then eliminate the insects. This series features sleek modern designs that are efficient and safe, boasting non-clogging grids that resist rust, cracks, or fading. The specially designed black light bulbs emit ultraviolet rays, which are harmless to both humans and pets, while an external mesh safeguards users from accidental contact with the electrified grids. This device involves no chemicals and produces no fumes, smells, sprays, or mess, making it environmentally friendly. It is ideally suited for indoor environments such as homes, factories, food shops, butcher's shops, and hospitals.

Instructions for Use

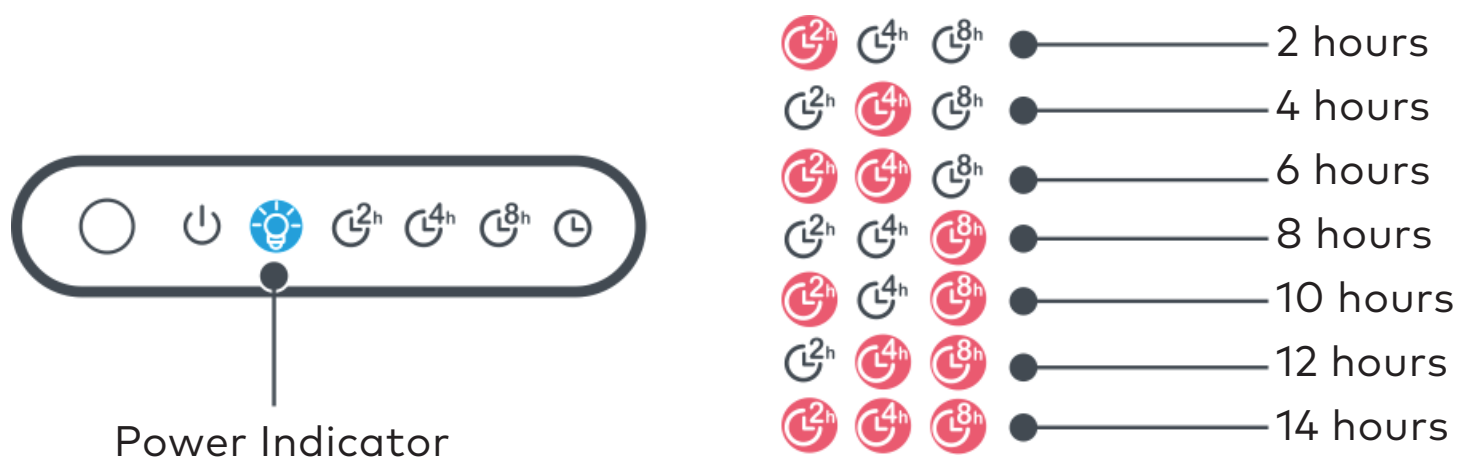

A. Schematic View

B. Usage Guide

1. Connect the power cord to a power outlet.
2. Press the main power switch on the side to turn on the device.
3. Use the host timer button and the timer +/- button on the remote control to set the shutdown time.
4. Use the remote control to set the timer for 2 ,4 ,6 ,8 ,10 ,12, or 14 hours.

Note: The same settings can be applied using the remote control for repeated use.

Warnings

1. Check the local voltage before use and avoid touching the internal high voltage grids to prevent electric shock.
2. Do NOT place any metal objects inside the grids while the appliance is in operation.
3. This appliance is designated for indoor use only.
4. Do NOT use in environments such as barns or stables where flammable vapors or explosive dust may be present.
5. Ensure the appliance is mounted or hung where children cannot reach that is at least 2.0 meters above the ground.
6. The appliance should not be used by individuals (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they are under close supervision or have been given comprehensive instructions on operating the appliance safely.

7. Never attempt to disassemble or make internal adjustments to the appliance. Contact the authorized service professionals for repairs if the supply cord is damaged, to prevent a potential hazard.
8. Always unplug the appliance before cleaning. Use a suitable brush to clean the high-voltage metal grids and remove insect remains from the collection tray weekly.
9. Never touch the high-voltage grids with your fingers or metal objects to prevent electric shock.
10. Do not wash the appliance with water or expose it to rain to prevent electrical hazards.
11. Avoid using the appliance in flammable or explosive environments such as garages, stables, or similar locations.
12. Repairs should only be carried out by the manufacturer or qualified electricians to ensure safety and maintain warranty.
13. Confirm that your local voltage and frequency are compatible with the appliance and that the earth connection is functioning properly to prevent potential hazards.
14. Do not replace the lamps in the appliance yourself. Contact the service professionals for appropriate replacements to ensure compatibility and safety.
15. ⚡ Due to its dangerous high voltage, always keep the insect killer out of reach of children.

Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.greenlion.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
