## Specifications

Product Name	Porodo 10000mAh Wall Charger Power Bank Integrated Type-C and Lightning
SKU	PD-PBFCH051-BK
Battery Capacity	10000mAh 37Wh
AC Input	110-240V, 50-60Hz
AC Output (USB)	5V/2A
USB-C Input	5V/2A, 9V/2A, 12V1.67A, 20W
USB-C Output	5V/2A, 9V/2A, 12V1.67A, 20W
USB-A Output	9V/2A 10V/2.25A 12V1.67A, (22.5W)
Built-in Cables	Type-C 5V/2A 9V/2.2A, 12V/1.5A, 18W, Lightning 5V/2A, 10W
Product Dimension	111×66×26m

Charging Cable

## K Product Overview

This product is a versatile portable charger designed for wired charging of various devices including mobile phones, tablets, and game consoles. It features a battery status indicator, compact design for easy portability, and supports both Type-C and Lightning cables. Equipped with built-in multiple safety protocols to manage charging, discharging, and temperature, this charger ensures a secure and efficient charging experience.

## K Charging the Product

1. Use the power adapter to plug into an outlet to charge your device.
2. Insert the Type-C charging cable into your device and connect the other end to the power bank. The indicator light will flash to show the charging status. When all four lights remain lit, the device is fully charged.

## K Indicator Guide

The power bank includes four battery indicator lights. Each represents 25 % of the battery capacity. A single light indicates 1-25 % battery remaining, two lights indicate 26-50 %, three lights indicate 51-75 %, and all four lights indicate 76-100 % battery remaining.

## Charging Other Devices

1. Verify that the charging voltage of your digital device is compatible with the output voltage of the power bank.
2. Use the original charging cable of your digital device. Connect one end to your device and the other end to the power bank's output port.
3. The power bank will automatically activate.

## Precautions

Please thoroughly review all instructions and warnings before using this product to ensure your safety and prevent misuse.

1. The charging interface on the mobile phone's back should not contain any metallic objects such as coins, rings, or metal cases, as these can interfere with charging.
2. If you notice intermittent charging or excessive heating during use, ensure that no foreign objects are obstructing the mobile phone's wireless charging coil. If necessary, cool the phone down, remove any obstructions, and realign it correctly on the charging pad.
3. This product features over-current protection to safeguard against excessive power draw. If misused, it will automatically reduce power output or shut down to preserve safety. Always verify that the device is operating correctly.
4. Avoid placing the product in extreme environments. Exposure to very high temperatures (above 50°C) or very low temperatures (below -20°C) can damage the product. It should not be used near water or fire, and it is not suitable for play by children, particularly with its small accessories.
5. To clean the product, use a dry, soft cloth. Avoid using any harsh chemicals, soaps, or detergents that could damage the surface.
6. Do not attempt to disassemble the product yourself; doing so can void the warranty and potentially cause damage.
7. Note that the actual capacity of the power bank might differ from the nominal rating due to energy conversion losses. Please consider this when assessing the device's charging capacity.

- 8.** To ensure optimal longevity and battery health, please charge your power bank every five months, even when not in frequent use.
- 9.** Misuse of this product can lead to malfunction or risk to both personal safety and property. Please follow the operating instructions carefully.
- 10.** Disassembly of this product by anyone other than qualified professionals is strictly prohibited and may result in voiding your warranty.
- 11.** Do not connect devices that draw more power than the output rating of this power bank as it can trigger the built-in circuit protection and stop outputting power.
- 12.** Avoid subjecting the power bank to physical stress such as impact, excessive force, or constriction to prevent mechanical damage.

Component	Toxic Materials

## Statement

This product follows the customization of SJ/T 11364, indicating that the levels of toxic and harmful substances in all homogeneous materials used in the components meet the standards specified in GB/T 26572.10. However, for certain auxiliary materials, the levels of toxic and harmful substances in at least one homogeneous material exceed the limits specified in GB/T 26572. This product complies with the EU RoHS 2.0 Directive (2011/65/EU).

## **Warranty**

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at [porodo.net/warranty](http://porodo.net/warranty) and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
