## Main Interface Overview

1	Game Console	Upon startup, you can select "Internal Card" or "External Card" and choose the game platform to play your desired game.
2	RA Emulator	Once inside, you can choose between "Internal Card" or "External Card" and select the platform for your games.
3	Favorites	Press the START button in the game center to add a game to this section, making it easily accessible.
4	History	Previously played games will appear in this section. You can clear the history via the settings menu.
5	Search	Quickly locate games stored on memory cards. Use the X key to delete keywords and the Y key to confirm search results.
6	Settings	Includes all settings for the GL-GC8, such as language options, backlight adjustments, background settings, and more.

## Product Overview

## Memory Card Instructions

Insert a FAT32-formatted memory card into the external card slot of the game console. A new folder for each platform will automatically be created. Simply place the game files into the respective folders and select the game from the game rooms.

**Supported platforms include:** ported games, PSP, PS1, DC, NDS, ARCADE, GBA, GBC, GB, SFC, FC, MAME, MD, GG, PCE, NGPC, SMS, and WSC.

## Settings

**Language Settings:** Go to Settings → Language Settings in the main menu. Available languages include Chinese, English, Japanese, Korean, Russian, French, and German.

**Backlight Brightness:** Navigate to Settings → Backlight Brightness in the main menu. You can choose from five levels of backlight brightness.

**Backlight Time:** Access Settings → Backlight Time in the main menu. Options include 1 minute, 2 minutes, 5 minutes, 10 minutes, and "always on." The screen backlight will turn off once the selected time has passed.

**Key Customization:** Go to Button Customization: Settings → Button Custom in the main menu. Here, you can modify the button mapping for both the device and the gamepad.

**Game Quality:** Options include high-definition, scan line, fast, and dot matrix. Each mode provides distinct screen filter effects for an optimized display experience.

## Indicator Light

The package includes a 5V/2A four-line charging data cable. Simply plug in the cable, and the device will begin charging.

The GL-GC8 features two indicators:

- The left light serves as the charging indicator.
- The right light functions as the working indicator.

Below is the table of light colors and their corresponding statuses:

● Green light	Working
● Red light	Low power
● Yellow light	Charging

## RA Emulator Shortcuts

Menu	Menu
Menu+R2	Fast Forward
Menu+L2	Slow Motion
Menu+R1	Save State
Menu+L1	Load State
Menu+Y	Display Frame Rate
Menu+B	Screenshot
Menu+X	Pause
Menu+START	Quit
Menu+ VOL+	Adjust Brightness
Menu+Left/Right Direction	Select Save State Slot

## Reset Instructions

- Insert the card into the card reader, then connect it to the USB port of your computer. There's no need to format the card, regardless of whether it already contains data.
- Use the provided updated link to download the necessary files to your computer.

**Note:** The file size is large. Ensure that your computer has sufficient storage space in the selected partition before downloading.

1. Download the file locally and unzip the file.

please find IMG format, and drag it to the Rufus tool

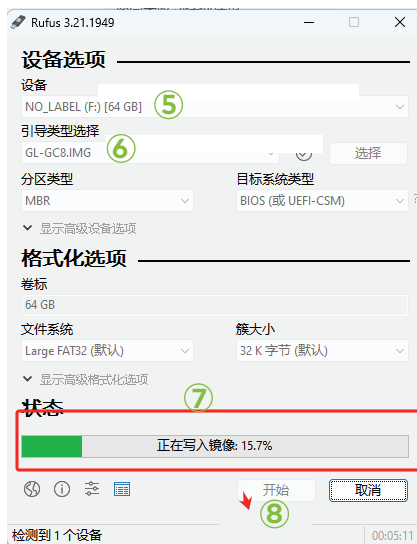

4. Open the Rufus-3.22.exe run in the refresh tool.

5. Select your card.

6. Select the extracted IMG file.

7. Wait for the process to finish.

8. Click start.

- This tool will automatically detect your card. Verify that the capacity is correct. Press the "Select" button and choose the "IMG" format. Then, click the "Start" button to begin flashing the image. Please wait patiently for the process to complete.

- Once the progress bar turns completely green at 100 %, the flashing process is complete, and you can safely close the flashing software.
- Finally, insert your card into the device to confirm if the process was successful.

## Specifications
