# Schematic View

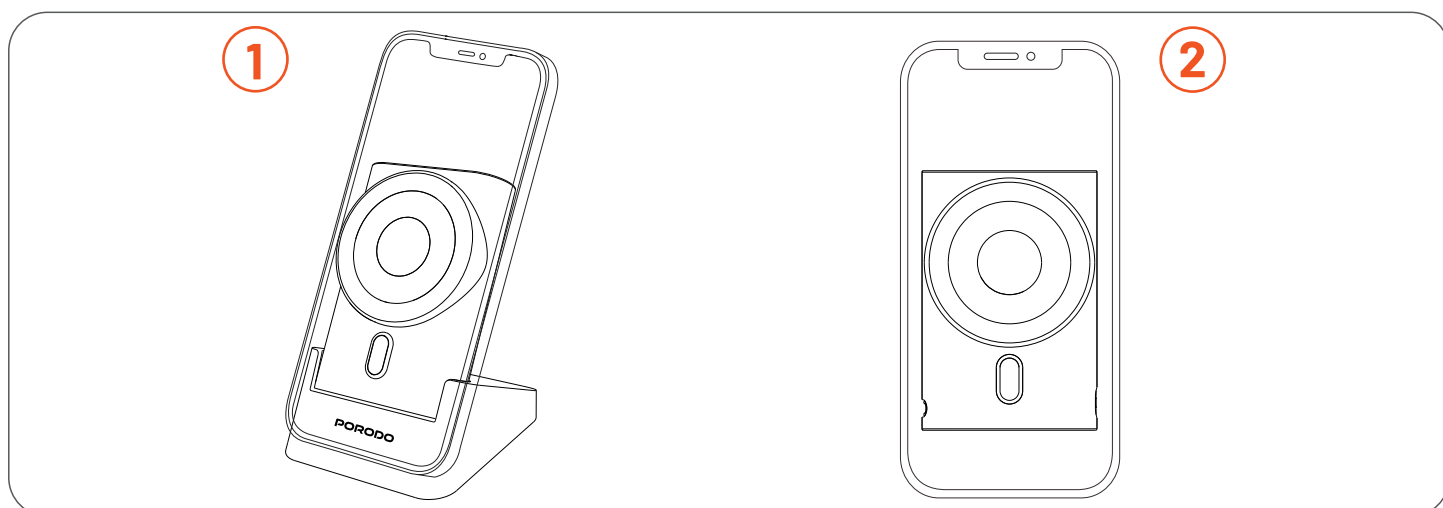

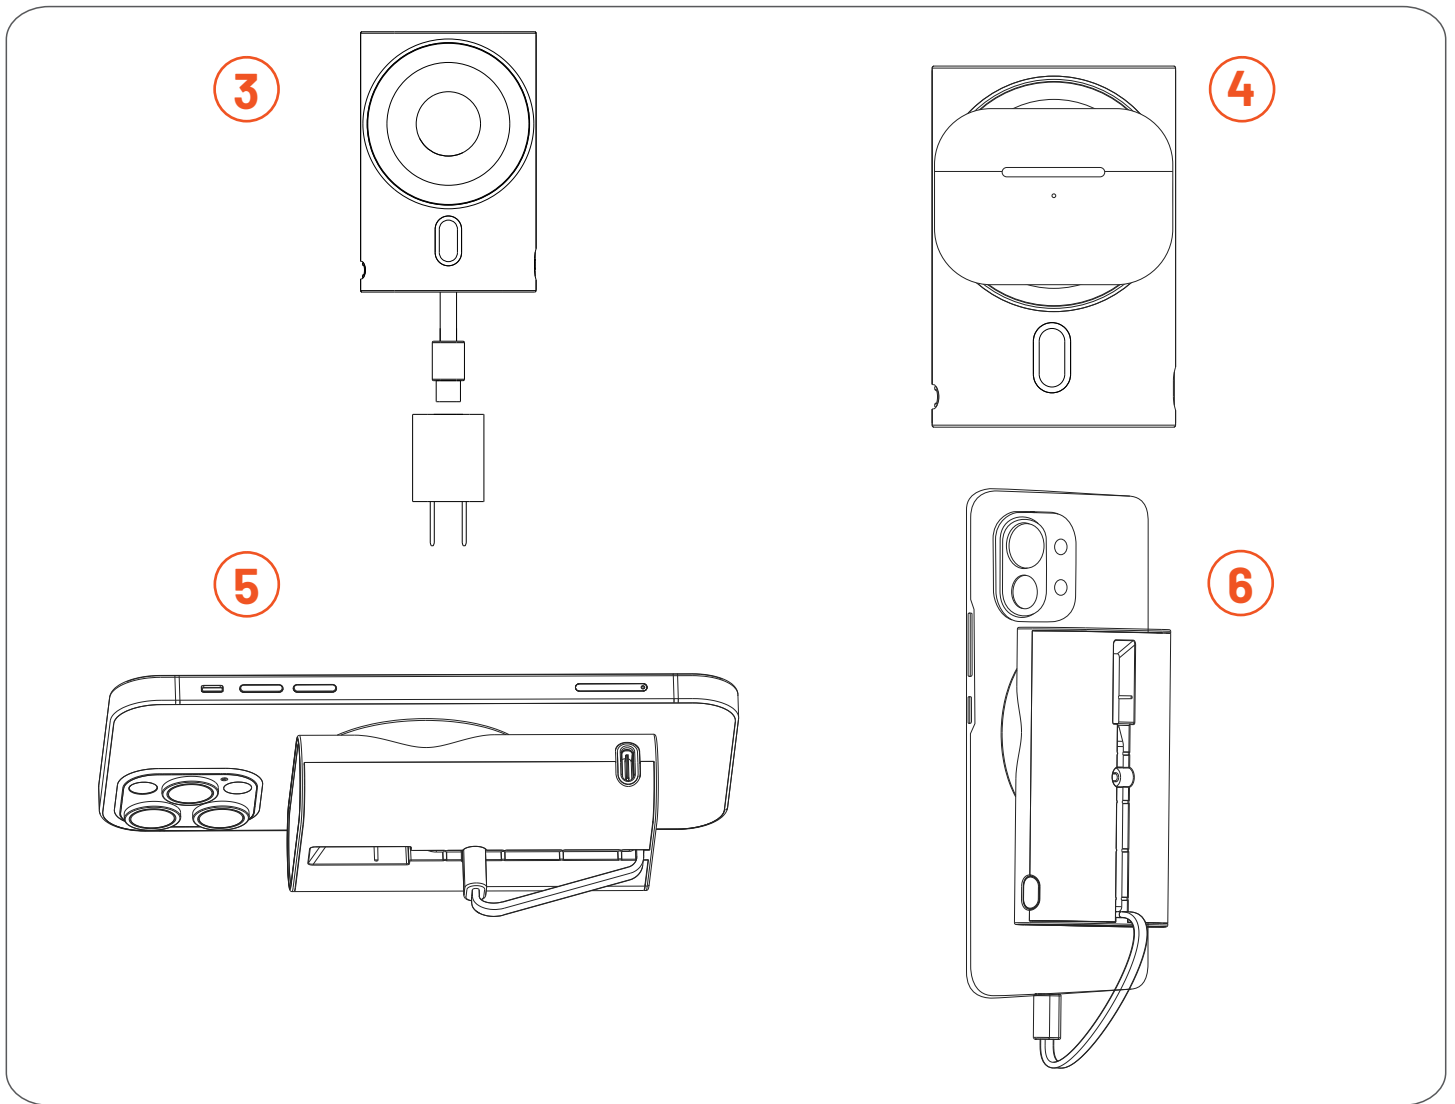

# Specifications

Battery Capacity	5200mAh
Type-C Output	20W
Wireless Output	5W, 7.5W, 10W, 15W
Dock Station Input	5V/2A, 9V/2.22A
Size	23.3×60×89mm
Charger	18W or Higher

## Instructions for Use

1. Connect the product to a power source. The indicator light on the Charging Holder will light up.
2. Place the power bank onto the Charging Holder.
3. Place a mobile phone with MagSafe magnetic suction capability near the magnetic charging area. The magnetic attraction will fix the phone in place, automatically aligning it with the charging position. The charging window will appear, and the phone will enter the charging state (See picture 1).
4. Remove the magnetic power bank from the base. Press the power button on the magnetic power bank, and the phone will begin charging (See picture 2).
5. The power bank can be charged via the Type-C cable (See picture 3).
6. Press the power button on the magnetic power bank. Place the back of the earphones on the front of the product, align them with the charging position, and the indicator light on the earphones will remain on, indicating they have entered the charging state (See picture 4).
7. Remove the Type-C head and insert it into the bracket slot to use the product as a mobile phone stand (See picture 5).
8. Press the power button on the magnetic power bank, remove the Type-C head, and insert it into the charging port of an Android mobile phone to enable wired fast charging (See picture 6).
9. Press the power button on the magnetic power bank twice to shut it down.
10. If a protective case with a magnetic ring is used, it will enhance the adsorption force.
11. The magnetic ring is universal and can be used on non-MagSafe phones.

## Safety Notice

1. Keep away from children, infants, and pets.
2. Do not pull the power cord forcefully to avoid damage or detachment.
3. Do not disassemble the product or throw it into fire or water to prevent short circuits and leakage.
4. Avoid using the product in extreme temperatures, high humidity, or corrosive environments to prevent circuit damage and potential electrical leakage.
5. Do not expose the product to water.

## FAQ

### 1. Slow Charging

The allowed wireless charging current may vary depending on the mobile phone or external receiving coil. Additionally, power-hungry applications running during

charging can slow down the process. It is recommended to close or reduce the use of applications.

## 2. Intermittent Charging or Indicator Flashing

This may occur if the mobile phone is incompatible or if a foreign object is detected.

## 3. Device Over-Heating

It is normal for the receiving coil or transmitting board to generate heat during wireless charging. Adjusting the position may help reduce the heat.

## 4. Mobile Cannot Be Charged While Power Indicator is Normal

This could indicate an issue with the mobile's receiving coil or misalignment of the wireless charging position. Try replacing the coil or repairing the phone.

## 5. Power Indicator Remains OFF While Power Switch is ON

The power bank may be worn out. Plug it into the Charging Holder. If there is still no response, the device may have failed. Please contact after-sales support for maintenance.

## Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

## **Warranty**

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.

For more info, please check:
