Product Overview

Dangerous Voltage

Tools should be kept away from children and should not be used in barns, animal sheds, or similar environments. The electronic mosquito killer lamp must not come into contact with the metal mesh during charging and operation. It is strictly prohibited to use the tool in environments containing flammable gases, explosive materials, or hazardous chemicals.

Instructions for Use

1. Press the power switch of the product to the "I" position. When the switch locks, the purple light will turn on, indicating that the power grid is under high voltage.
2. When harmful flying insects, such as mosquitoes, come into contact with the

power grid, they will be killed.

3. Press the power switch again to the "0" position, and the purple light will turn off. At this time, there may still be residual voltage in the power grid.

Note: Do not touch the power grid immediately, as the voltage will dissipate automatically after a short time.

4. To turn off the mosquito-killing function, press the power switch to the "0" position.

5. If you do not use the mosquito lamp, disconnect the power and store it in a cool and dry place.

Note: This product complies with the implementation of Q/JYMST2022-001.

Dismantling of Mesh Cover

- 1.** Please familiarize yourself with the product usage precautions before use.
- 2.** Turn off the power before cleaning the power grid. Unscrew the two screws of the power grid before removing it for cleaning.
- 3.** Do not rinse mosquito carcasses with wet towels or water. Use a soft brush with long bristles or gently tap the mesh.

Precautions

- 1.** When the mosquito killer lamp is working, there is high voltage in the power grid. Keep away from children and avoid any contact with children.
- 2.** Do not use this product in areas with flammable or explosive gases, liquids, or dust. Also, avoid using conductive materials, such as metals, that may cause sparks on the power grid.
- 3.** Stay away from flammable and explosive materials and chemicals.
- 4.** When not in use, disconnect the power supply. Always refer to the instruction manual for safety guidelines.
- 5.** Do not wipe or rinse mosquito residues on the power grid with wet towels or water. After each use, use a long-haired soft brush or tap lightly to remove the residues (as they may cause a short circuit and damage the mosquito killer lamp).

- 6.** In humid weather, mosquito lamps may absorb moisture, affecting their performance. It is recommended to blow-dry the lamp with a hair dryer or place it in the sun to dry it thoroughly.
- 7.** Do not use this product on other objects or pinch the mesh surface to avoid damaging the power grid.
- 8.** Always follow the provided instructions and precautions for use. Do not disassemble the product at will. Our company will not be responsible for any adverse effects caused by unauthorized operation.
- 9.** Before disposing of the product, remove the battery. Ensure that the product is powered off and dispose of the battery safely.

Specifications

Battery Capacity	2000mAh
Rated Power	4.5W
Working Time	Up to 4H
Input	5V/1A
Charging Interface	Type-C
Mosquito Killing Voltage	3000V
Product Size	155 x 372×155mm
Model Number	LFS135

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at porodo.net/warranty and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
