## Note

The earphones automatically pop up and connect when removed, displaying the battery status.

**Note:** This feature requires an iOS version 13.2 or later.

## Overview

## Specifications

Model No	GPRO2+
Bluetooth	BT 5.2
Battery	3.7 V/230mAh
Charging time	2H
Input	DC 5V/1A
Working Time	Around 5H
Standby time	180 Days

## Button Guide

**Power On:** Open the charging case and switch it on to power up the headset.

**Power Off:** Place the headset into the charging case and close the lid to turn it off.

**Answer Call / Hang Up:** To answer or end a call, click on either earbud once.

**Reject the Call:** To reject an incoming call, double-click either earbud.

**Siri Wake Up:** To activate Siri, press and hold either earbud for 2 seconds.

**Play/Pause:** To play or pause the music, click once on either earbud.

**Previous Track:** To skip to the previous track, click the earbud three times.

**Next Track:** To skip to the next track, double-click either earbud.

## Wireless Connection

1. Ensure the wireless headset is within a 1-meter range of your mobile phone or other devices to establish a stable connection.
2. Open the charging case and remove the earphones. Confirm that both the left and right earphones are connected—this will be indicated by the blue light on either the left or right earphone flashing alternately, while the other earphone light will turn off. This indicates that the earphones are in pairing mode.
3. Activate Bluetooth on your mobile phone or other Bluetooth-enabled devices. Search for available devices and select the headset name "Green Lion Pro 2." Once the connection is successfully made, the indicator light on the headset will turn off, confirming a successful pairing. You can now make calls and enjoy music.

## iOS Wireless Connection

The iOS device can be connected using the Bluetooth connection method described above, or by following these steps:

1. Ensure the headset is placed in the charging case and that the Bluetooth function on your iOS device is enabled. Keep the charging case within 10 meters of the device.
2. Open the charging case. Your iOS device will automatically display the earphone connection interface. Select the connection option on your device. Hold the charging case button until the connection is successful, at which point both the device and the charging case will display the connection status and power level.
3. Once this process is complete, it indicates that the headset has been successfully connected.

### **Note:**

1. The above operation requires an iOS device 7 or later, with iOS version

13.2 or higher.

**2.** Ensure the charging case has sufficient power. If the headset is not powered on, place it into the charging case, close the case, and plug in the charger for at least one hour.

**3.** Do not close the charging case during the connection process.

**4.** The Bluetooth function of your iOS device must be enabled in advance.

## LED Status Indicators

**Power On:** The Bluetooth indicator flashes when powered on.

**Charging Box Charging:** The orange light turns off for 10 seconds before extinguishing, indicating charging activity.

## Troubleshooting

**1.** The Popup Interface Cannot Be Connected

**Solution:** Ensure that your device is an iPhone 7 or newer, with iOS version 13.2 or higher. Additionally, verify that the Bluetooth function is enabled on your device.

**2.** The Headphones Are Not Connected or There Is No Sound in the Left and Right Headphones

**Solution:**

**2.1** Check that both the headset and charging case have sufficient power. Insert both the left and right earphones into the charging case, close the lid, and then open the case after 10 seconds. The earphones and case should pair automatically. After waiting for 10 seconds, close the charging case lid. At this point, open the charging case again to trigger the pairing prompt on your phone. If the prompt does not appear, manually search for and select AirPods Pro in your phone's Bluetooth settings.

**2.2** When the case lid is open, the blue light on the earphones will flash

for 5 seconds. Once one of the earphone lights turns off, it indicates that the connection can be established.

## Safety Precautions

1. Keep away from children and pets.
2. Never use abrasive cleaners or detergents to clean the product.
3. Avoid exposing the product to heat or placing it near any source of ignition, such as a stove.
4. Do not expose the product to direct sunlight for extended periods.
5. Do not dispose of the product in fire to prevent the risk of explosion.
6. Do not attempt to disassemble the product, as it does not contain any serviceable components.
7. Avoid using the product in the rain.

## Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

## Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.greenlion.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
