Precautions

1. Do not charge the product in humid or wet environments.
2. Avoid using high-power chargers for charging. Use only the standard 5V/1A charger and the included charging cable.
3. This product should not be submerged in water. In the event of exposure to rain or water, wipe it clean immediately.
4. The material of this product is relatively soft; handle with care and avoid dropping it.
5. This product is equipped with video and photo functions. Ensure the camera lens and surface are clean to maintain optimal photo quality.
6. The lenses of these smart glasses can be replaced. Visit a local optical shop for lens replacement according to your needs.
7. This product supports both photo and video recording functions. Exercise discretion when using it for candid photography.
8. Always adhere to local laws and regulations when using this product.
9. When taking photos or recording videos, the left flash will illuminate. If you encounter any issues, please seek prompt repair.

Product Components

Connection Instructions

1. These smart glasses are a stand-alone product. Some functions require a connection to a mobile phone for full functionality.
2. Download and install the "HeyCyan" app from your mobile app store.
3. Alternatively, scan the QR code provided to download, install, and use the app.

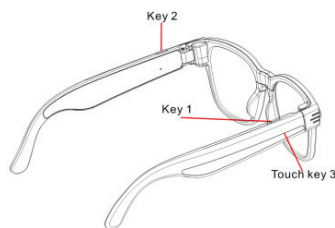

Open the installed app and follow the on-screen prompts to complete the registration.

Navigate to "Home" and tap "Connect Devices."

Select the device labeled "GL-SG22" from the available devices and pair it

Once paired, the connection will be successful.

Button Guide

a. Button 1 Functions:

1. In the powered-off state, press and hold for 3 seconds to turn the device on.
2. In the powered-on state, press and hold for 5 seconds to turn the device off.
3. When the device is on, press and hold for 10 seconds to restore factory settings. Note: This will erase all data on the device. Use this function with caution.
4. In the powered-on state, press the button briefly to take a photo. The flash will illuminate, and the photo will be automatically saved to the device's local memory. You can import the photo into the mobile app.
5. When connected to a phone, double-press the button quickly to start video recording. The flash will remain on while recording. Press the button briefly to stop the recording. The video will be automatically saved to the device's local memory and can be imported into the mobile app (direct import via Will).
6. The default recording duration is 3 minutes, which can be adjusted in the app settings (options: 15s, 30s, 60s, 3 minutes, 9 minutes, 12 minutes).
7. Please note: 9-minute and 12-minute video recordings consume more power, which may cause the device to heat up. It will return to normal once the recording stops.
8. In the powered-on state, press and hold for 16 seconds to force a restart of the device.

b. Button 2 Functions:

1. In the powered-on state, press once to activate the AI voice assistant.
2. In the powered-on state, press twice quickly to enable quick map reading.
3. In the powered-on state, press and hold to start recording. Press briefly during recording to stop.
4. The default recording duration is 30 minutes, with options for 30 minutes, 60 minutes, or 120 minutes.
5. The recorded audio will be automatically saved to the device's local memory and can be imported into the mobile app (direct import via Will).
6. In the Bluetooth connection state, when receiving an incoming call, press Button 1 or 2 briefly to answer. Press once during the call to hang up.
7. In the Bluetooth connection state, when receiving an incoming call, press and hold Button 1 or 2 for 2 seconds to reject the call.

c. Touch Key 3 Functions:

1. While music is playing or during a call, slide left or right to adjust the volume.
2. When music is playing, double-tap the slider to pause. When paused, double-tap to resume playback.
3. When music is playing, remove the glasses to pause the music, and put them back on to resume playback.
4. While music is playing or paused, press and hold the slider to skip to the next track.
5. While music is playing or paused, triple-tap the slider to play the previous track.

APP Function Usage

1. On the home screen, tap the glasses icon in the upper right corner (next to the Bluetooth name) to access settings for your glasses, including options like wearing detection and recording preferences.
2. On the home screen, you can tap on the glasses function settings for detailed explanations, with helpful icons to guide you.
3. In the album section, you can organize your photos, videos, and recordings, as well as import them directly from this page.

Important Notes

1. When the device is powered on, the indicator light will flash blue. Once the device is connected to the app, the light will turn off. When the device is powered off, the indicator light will flash red before turning off.
2. While taking photos or recording videos, the blue indicator light will remain on, turning off once the process is complete.
3. During data transfer, the blue indicator light will be on and will turn off once the transfer is finished.
4. While recording, the blue indicator light will remain on, turning off when recording is complete.
5. If the battery level falls below 15%, the device will stop taking photos or recording videos.
6. As a smart product, regular software updates will be available, and the app will notify you when an update is ready.
7. If the battery level drops below 15%, the upgrade process will not be possible. Please charge the device before attempting the upgrade again.

8. When the battery level is below %20, data transmission will automatically stop. Charging the device will allow you to resume data transmission.

9. This product supports WiFi transmission, which requires the mobile phone to be connected to the app.

10. High power consumption occurs during recording and data transmission. Extended use of these features may cause the device to heat up, but it will return to a normal temperature once the functions are stopped.

11. For Android Users:

11.1 After pairing the device with the app, navigate to Phone Settings > Bluetooth, and find the paired glasses ID. Tap the settings icon next to it and enable the "Synchronization with Phone" option to sync the device's volume with your phone.

11.2 To unbind the device, go to Phone Settings > Bluetooth, select the device, and choose "Forget" to disconnect it. This will allow other phones to connect to the device.

Specifications

Model No.	GL-SG22
Material	PC + Zinc Alloy
Chip	JL7018F
Camera Chip	IMX219
Camera Resolution	800 W
Photograph Resolution	3200 W (Interpolated)
