Safety & Warning Measure

Before using this product, please make sure that the battery is fully charged. You can check the battery level indication on the display screen for confirmation. This can effectively prevent sudden power failures during use and ensure that your experience remains uninterrupted.

Once the battery level drops to a low level, please charge it immediately. Prolonged operation at a low battery level may cause charging issues, which will interfere with the normal charging process later.

When operating this product, pull and retract it gently to prevent the internal wiring from being damaged due to excessive pulling forces. It is particularly important to note that this product must not be used underwater. Although it has an IPX4 waterproof rating, do not soak it in boiling or warm water for an extended period.

Before charging, please open the silicone protective plug first. It is recommended that you use a charger with a standard specification of 5V/2A. This product supports a maximum charging specification of 9V/2A. Using chargers with other non-standard specifications may result in abnormal charging, such as failure to charge or slow charging.

To avoid the risks of electric shock and fire, do not disassemble or modify the product structure without permission.

If the charging interface is damp or has obvious water traces, do not charge it to prevent the risk of electric shock. Pay attention to keeping the charging interface dry on a daily basis.

When the lamp blades have rotated to their limit and can no longer turn, do not force them to rotate to avoid damage.

Warning

To reduce the risk of injury, the user must read and understand the Operator's Manual before using this product. Save these instructions for future reference

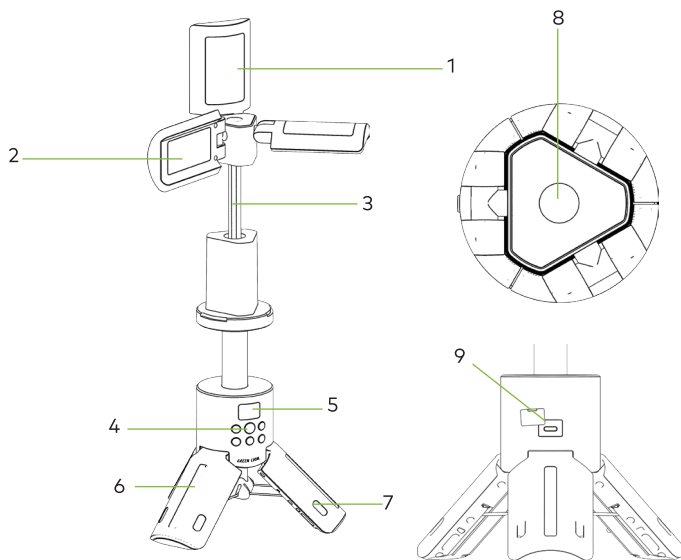

Specifications

Material	PC, ABS, Aluminum Alloy
Battery Capacity	10,050mAh
Input	5V/3A, 9V/2.22A, 12V/1.67A
Output	5V/3A, 9V/2.22A, 12V/1.67A (20W)
Color Temperature Range	1500K-6000K
LEDs	72 White + 54 Golden + 54 RGB = 180 LEDs
Power (Main Light)	10W
Color Rendering Index (CRI)	>80
Luminous Flux	1000 lm \pm 10%
Light Modes	White Light / Golden Light / 7-Color RGB
Flashlight Power	3W
Charging Port	Type-C
Battery Life	4.5 - 80 Hrs(Low to Max Mode)
Product Weight	800g
Foldable Dimensions	26.4*6.7 cm
Unfold Dimensions	107*20.3 cm

Function Description

	<p>Power Button:</p> <p>Long press the power button: turn on/off; Short press the power button: main light - flashlight - flashlight SOS (the +/- function adjustment is not supported in the flashlight mode).</p>

User
Guide

Usage Note

1. Pull the lamp head upwards to extend the telescopic rod, and then adjust the illumination height and range.
2. The product can reach a maximum height of 107 centimeters.

3. The lamp blades can be adjusted freely in terms of angle.
4. Adjustment range of the angle: $270^{\circ} - 0^{\circ} / 180^{\circ} - 0^{\circ}$

5. When using the magnetic suction function, open the bottom bracket.
6. Make sure that the slope of the bracket is in full contact with the metal surface.

Attention! When the rotator cannot rotate, do not force it to rotate.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at <https://www.greenlion.net/warranty> and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
