MALONE
MULTI-PORT USB-C HUB

SKU: PDBS8HPK

Table of Contents

Product Overview

The Porodo Malone Multi-Port USB-C Hub offers a versatile and high-performance solution for expanding connectivity. With 100W Power Delivery (PD), 4K HDMI output, and an RJ45 Ethernet port providing speeds up to 100 Mbps, it ensures fast data transfer and stable network connections. The hub also features multiple USB ports, including USB-C, USB 3.0, and USB 2.0, along with an SD/TF card reader. It supports Plug & Play functionality, making it easy to use with no additional software required. Perfect for those needing efficient data handling and video output, this sleek hub is compatible with various devices, enhancing productivity and connectivity.
Specifications

Interface Connector	USB-C
HDMI	4K @30Hz; 1080p @60Hz
USB 2.0 Transfer Rate	480Mbps
USB 3.0 Transfer Rate	5Gbps
Ethernet	RJ100/10 45Mbps
Cable Length	140mm

Material	ABS
Net Weight	84g
Product Size	22 × 43 × 136mm
Model Number	PDBS8H

Setup Guide

1. Make sure your equipment and connection cable are working properly before you use them.

USB-C male plug

USB-C female interface

2. USB-C interface supports forward and backward plug and play, and there is no need to install drivers for the HUB.
3. When removing the device, please remove the device according to the system specification, otherwise, it may cause data loss and equipment damage.
4. It is not recommended to use the USB-A interface to charge other devices because the current is low and the charging speed is slow.

If the product does not work properly, please check as follows:

1. Know whether the model of your original equipment is compatible with the product.

2. Check whether the original equipment and connecting wire can be used normally.

3. Replace the equipment or connect the cable to operate again and verify.

4. For more problems, please contact us through the purchasing platform information.

Product Q & A

Question	Why does the product feel hot when used?
Answer	When electronic products are used, heat will be generated. The body of this product is made from aluminum alloy shell, which can quickly export the heat to the surface. When the product is fully loaded, the temperature of the metal shell is about 55 degrees (the temperature of the experimental environment is 25 degrees). According to gb4943.1-2011 standard, the metal material of the equipment held in a short time shall not exceed 60 degrees. The temperature is within the standard range, so please feel free to use it.

Safety Precautions

Failure to follow the safety instructions below may result in fire, electric shock, damage or other injury.
Don't place the product in a corrosive environment.
Don't use in high temperature, low temperature, humidity, dusty environment, and long-term exposure to sunlight, and keep away from fire sources.
The ambient temperature of the product is maintained at 0-45°C.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **https://www.porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
