Product Overview

The Porodo 3000W Universal Power Strip is a versatile and powerful solution designed to meet your charging and power needs. It features 5 universal AC outlets capable of handling up to 3000W and provides 9 USB ports with a total output of 35W for fast and efficient charging. The power strip includes built-in safeguards for protection, a safety power switch, and a 24-hour timer for added convenience. With a 3m UK cord, it offers flexibility in device placement, and the quick charge (QC 20W) capability ensures rapid power delivery. Ideal for home, office, or travel use, the Porodo Universal Power Strip combines functionality and safety in one sleek, space-saving design.

Specifications

Rated Voltage	AC 110V-265V
Rated Frequency	50/60Hz
Rated Power	3000W
Total USB Output	85W
USB-C1 Output	5V/3A, 9V/3A, 12V/2.5A,15V/2.33A, 20V/1.75A, PD 35W
USB-C2 Output	5V/3A, 9V/2.22A, 12V/1.67A, PD 20W
USB-C3/C6 Output	5V/2.1A, 10.5W
USB-A1 Output	5V/3A, 9V/2.22A, 12V/1.67A, 20W
USB-A2/A3 Output	5V/2.1A, 10.5W
AC Outlets	5x Universal Sockets
Housing Material	PC Flame-Retardant
Power Cord	3m UK 3-Pin Plug
Product Size	35 x 110 x 276mm
Model Number	FWC098

Product Features

a. 5 Universal AC Outlets

The power strip offers 5 universal AC outlets that are compatible with a wide range of devices, such as laptops, TVs, kitchen appliances, and more. With a total power capacity of 3000W, it can support multiple devices simultaneously, making it ideal for both home and office use.

b. 9 USB Ports (6 USB-A + 3 USB-C)

The strip features 9 USB ports—6 USB-A and 3 USB-C, allowing you to charge multiple devices at once. The combination of USB-A and USB-C ensures compatibility with a wide range of devices, including smartphones, tablets, and laptops, without requiring separate adapters or charging bricks.

c. Quick Charge Technology (QC 20W)

With Quick Charge 20W technology, the power strip provides faster charging for supported devices, reducing wait times and ensuring your devices are powered up in no time. This feature is perfect for high-speed charging of smartphones, tablets, and other USB-powered electronics.

d. Built-In Safeguards

The built-in safeguards provide comprehensive protection against power surges, short circuits, and overheating. This ensures the safety of both the connected devices and the power strip itself, reducing the risk of damage and extending the longevity of your electronics.

e. 24-Hour Timer

Equipped with a 24-hour timer, this power strip allows you to set a specific time for your devices to be powered on or off. This feature is useful for energy conservation, preventing overcharging, or automating power for devices like lamps, fans, and other appliances.

f. 3m UK Cord

The 3-meter UK cord offers enhanced flexibility in terms of device placement, allowing you to position the power strip further away from the power source. This extended cord length makes it easier to connect devices in larger rooms or spaces without the need for extension cords.

g. Safety Power Switch

The safety power switch enables you to quickly disconnect all connected devices from power with a single flick, providing an easy way to cut off power when the strip is not in use. This adds an extra layer of security by preventing any potential electrical hazards or power surges.

Safety Precautions

1. Avoid Overloading

Ensure that the total wattage of all connected devices does not exceed the 3000W limit of the power strip. Overloading the strip can cause overheating, short circuits, or even fire hazards. Always check the power requirements of your devices before connecting them.

2. Keep Away from Water

Never expose the power strip to moisture or water. Do not use the strip in wet areas like bathrooms or kitchens unless specifically rated for such environments. Water contact can lead to electrical shocks or damage to the internal components.

3. Proper Ventilation

Place the power strip in a well-ventilated area to avoid heat buildup. Always ensure there is enough space around the device for air circulation.

4. Avoid Using Damaged Cords

If the power strip's cord or any of its components are damaged, do not use it. Damaged cords or exposed wiring can pose electrical hazards and increase the risk of fire or electric shock. Replace any damaged parts immediately.

5. Unplug When Not in Use

For added safety, unplug the power strip when not in use or when you are away from home for extended periods. This will help prevent power surges and minimize the risk of electrical accidents.

6. Check for Proper Grounding

Ensure the power strip is properly grounded when in use. Incorrect grounding can lead to electrical shock or damage to your devices. Always verify that the power strip is connected to a grounded outlet.

7. Keep Away from Flammable Materials

Keep the power strip away from flammable materials, such as paper, cloth, or

furniture. Heat from electrical components could ignite these materials, leading to potential fire hazards.

8. Use the Timer Feature Wisely

When using the 24-hour timer, avoid leaving devices plugged in for extended periods of time. Set the timer according to the actual need to prevent overcharging or excessive energy consumption, which could lead to overheating.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
