Overview

A versatile, high-performance torch designed for both culinary and outdoor use. It features adjustable flame control, one-touch ignition, and a thickened steel pipe for durability. The ergonomic grip handle ensures comfort, while its multi-purpose design makes it ideal for caramelizing desserts, roasting, soldering, camping, and more.

Instructions

A. Component Overview

B. Installation Guide

1. Attach the Butane Gas Canister

Aim the Butane Gas Canister at the bayonet of the flamethrower. Secure the air tank by tightening it clockwise, and loosen it counterclockwise to disconnect.

2. Adjust Gas Flow

Turn the knob counterclockwise to release a small amount of gas. You will hear an eject sound once the gas begins to flow.

3. Ignition

Press the ignition switch to initiate the flame. (There is no need to keep pressing after ignition is complete.)

4. Adjust Flame Intensity

Turn the black knob to adjust the firepower (turn counterclockwise for higher power).

5. Fine-Tune Flame

Use the soft and hard fire adjustment button to refine the flame to your desired intensity.

6. Turn Off

To switch off the flamethrower, simply turn the air tank adjustment knob clockwise to close

Before Use

1. Read all warning labels, guidelines, and instructions provided with the accompanying gas cylinder before attaching it to the flamethrower.
2. Turn off the fire lance switch (tighten it clockwise and loosen it counterclockwise).
3. Connect the flamethrower to the cylinder by ensuring proper tightening and that it is securely sealed.
4. Slightly turn the switch knob of the gun body and press the ignition switch to ignite the flamethrower.
5. Adjust the gun body switch knob to regulate the flame output to your desired level.
6. The model can be used upside down but needs to be fully preheated. It is recommended to set the preheating time for at least 1 minute.
7. Avoid overusing the flamethrower to prevent overheating and damage to the unit.
8. Environment, air, and temperature may affect the flamethrower's burning time. Always use it in a controlled environment.
9. Never use the flamethrower in confined spaces or unattended areas. Ensure the surrounding area is safe and well-ventilated.
10. Always use the flamethrower outdoors and ensure fire extinguishers or other firefighting equipment are nearby.

After Use

1. Turn off the flamethrower and ensure the flame is completely extinguished.
2. Do not touch the fire outlet or other parts immediately after use, as high temperatures may cause burns or other injuries.
3. Do not connect the flamethrower to the gas tank for storage.
4. Store the flamethrower in a safe place, out of reach of children, and in environments that are safe and not exposed to extreme temperatures.

5. After each use, inspect the flamethrower for any abnormalities. If there are issues, refrain from using it and contact after-sales support.

Safety Guidelines

1. This product has built-in internal settings. Do not attempt to modify or change the design or settings for unintended purposes, as this may result in serious consequences and product damage.
2. If the seals of the product are found to be damaged, immediately cease use and contact the manufacturer's after-sales service for assistance.
3. If the product shows signs of leakage, damage, or abnormal function, stop using it and contact the manufacturer's after-sales service for support.
4. Ensure the spray gun valve is closed before installing the gas tank. Do not smoke or place near open flames or other heat sources. Always use the product in well-ventilated spaces.
5. Maintain a safe distance of at least 50cm between the nozzle of the spray gun and any surfaces (walls, ceilings, or objects). Never point the nozzle toward people or animals.
6. Children are strictly prohibited from using this product. Any individual using the product for the first time should thoroughly read the instructions and ensure familiarity with safe operation before use.
7. In the event of gas leakage, immediately turn off the product and remove it from any fire or heat sources. Contact the manufacturer's after-sales service for further guidance.
8. Clean the product's surface with a soft cloth. Do not use abrasives or cleaners that may damage the product. If there is any fault in the outlet, contact after-sales service for repair and do not disassemble the product without authorization.
9. After use, store the product in a dry, well-ventilated area, out of reach of children. Avoid exposure to environments exceeding 40°C or direct sunlight for extended periods.

Warning:

The supplier shall not be responsible for any damage to the product or any adverse conditions resulting from failure to comply with the safety methods and recommendations outlined in this manual.

Specifications

Model No.	GTL52
Material	Nylon, Stainless Steel, Copper, Aluminum Alloy
Gas Type	Butane Gas Canister
Nominal Heat Input	1.5 kW
Temperature	1300°C Max
Flame Length	Adjustable (4.5 cm Max)
Gas Consumption	109 g/h
Product Weight	247 g
Product Dimension	160 x 76 x 270 mm

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.greenlion.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
