Product Overview

This product is made from high-quality LED light sources, a high-energy-density lithium battery, and durable high-strength aluminum alloy. The lamp's surface is specifically treated to ensure optimal performance in various environments. It features exceptional brightness, long-lasting endurance, fall resistance, wear-resistance, and is fully waterproof. This versatile product is ideal for a wide range of applications, including but not limited to family and emergency lighting, outdoor activities such as mountaineering, hiking, and camping, as well as work inspections and search operations. Its robust design makes it suitable for various security lighting needs and other occasions, offering convenient and flexible operation wherever it's needed.

Specifications

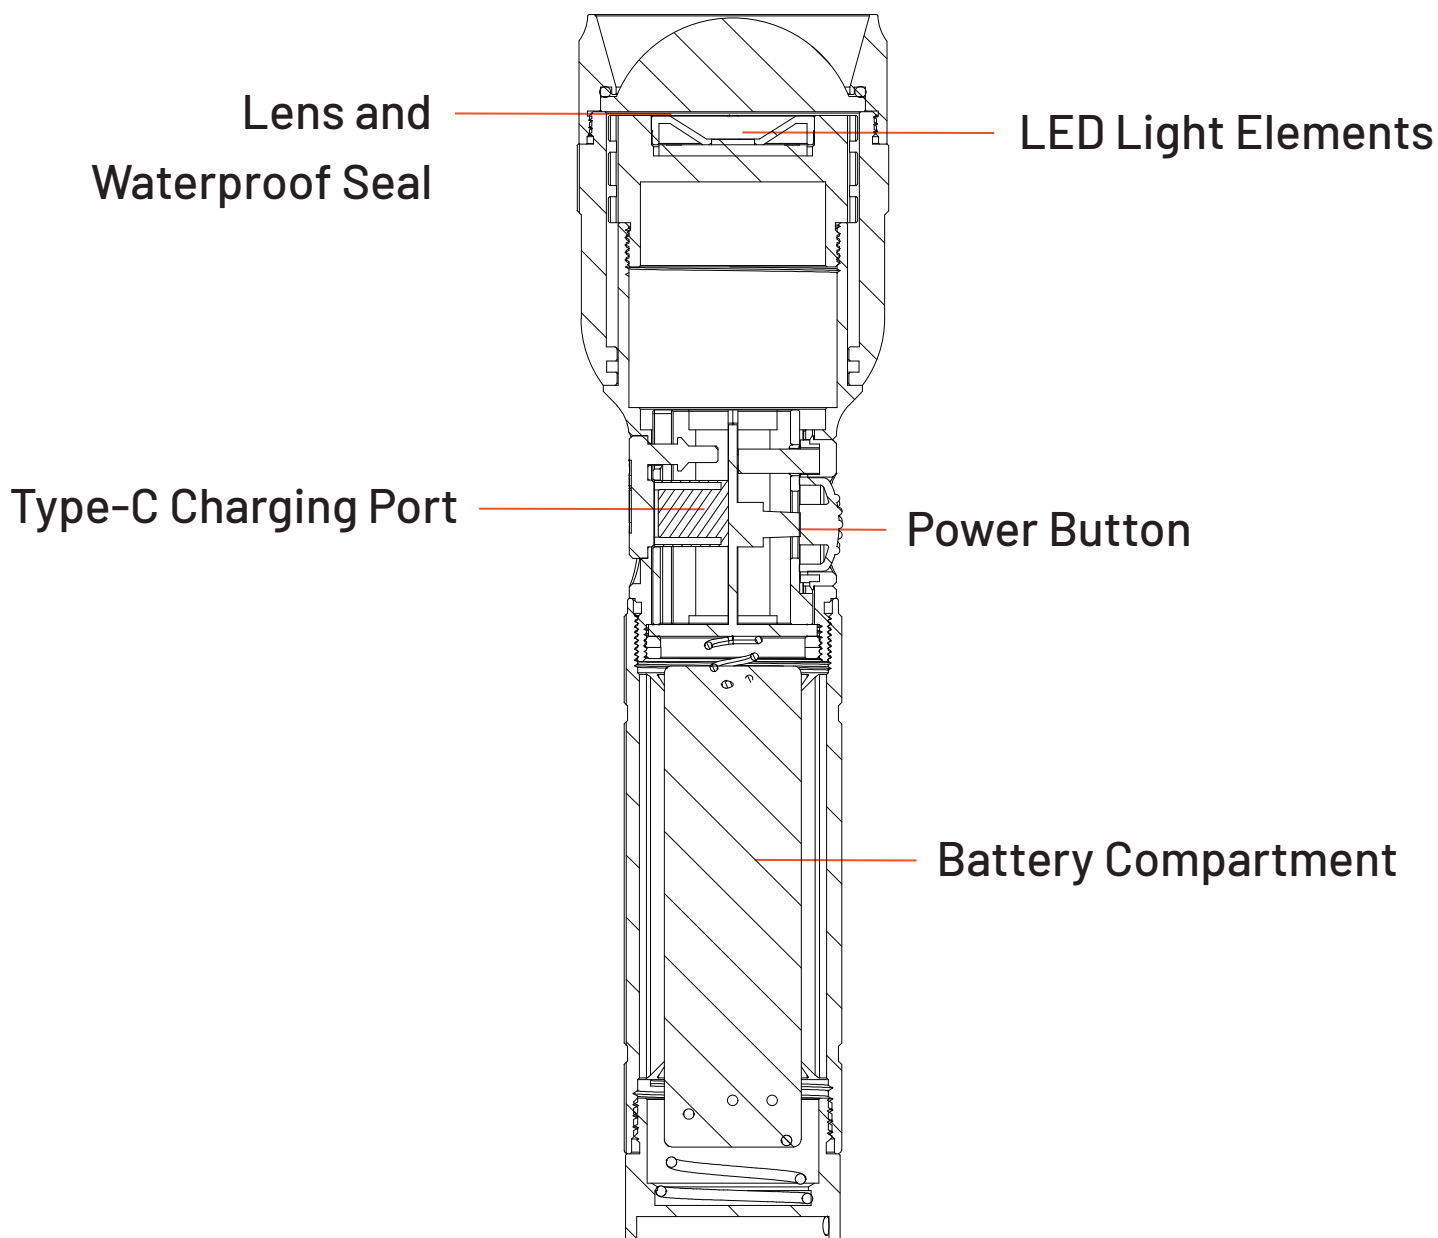

Input	5V/1A
Battery Capacity	2000mAh
Rated Power	30W
Brightness	150LM
Distance	500m
Charging Interface	Type-C
Charging Time	4H

Working Time	84 Minutes
Water-Resistance Level	IPX5
Product Size	29.4×42.1×162.5mm
Product Weight	227g
Model Number	PDFL2101

Key Features

- 1. Ultra-Bright Beam:** Equipped with a 150-lumen light, it ensures maximum brightness for visibility in any condition.
- 2. Coverage:** Reach distances up to 500 meters, allowing you to light up large areas with ease.
- 3. Manual Zoom Control:** Adjust the beam to your specific needs, providing you with flexible control over the light focus.
- 4. Multiple Light Modes:** Choose from different settings, including the option for a steady beam or pulse mode.
- 5. Rechargeable Battery:** With a long-lasting battery, the flashlight ensures continued performance, keeping you powered through your tasks.
- 6. Durable Design:** Built to withstand the elements and tough environments, making it reliable for both casual and demanding users.

Schematic View

Battery Indicator

The flashlight is equipped with a feature that helps you track the remaining battery life. The number of green lights displayed indicates the current charge level:

a. 4 Green Lights: Full charge (100% power). Your flashlight is at maximum capacity and ready for extended use.

- b.** 3 Green Lights: The battery is at 75% capacity. There is plenty of power for continued use, but it's a good time to start thinking about recharging.
- c.** 2 Green Lights: The battery is at 50% capacity. You may want to recharge soon to avoid running out of power unexpectedly.
- d.** 1 Green Light: The battery is at 25% capacity, indicating low power. It's time to recharge the flashlight to ensure it's ready for the next use.

Usage Instructions

1. Lightning Modes:

Press the button once to cycle through the available light settings. You can select from the following modes:

- a.** Normal Mode: In Normal Mode, the light is normal. Press the button once to cycle through the different light settings.
- b.** High Light Mode: This mode provides maximum brightness, ideal for brightening large areas or when you need maximum visibility.
- c.** Low Light Mode: This setting offers a softer, more energy-efficient light, perfect for reading or close-up tasks where a dimmer light is needed.
- d.** Off Mode: Press the button to turn off the flashlight completely when it is not needed.

2. Special Lightning Modes:

In Special Mode, quickly double-click the button to enter one of the following advanced lighting options:

- a.** Flash Mode: This mode activates a rapid flashing light, typically used for signaling or emergencies where attention needs to be drawn immediately.
- b.** SOS Mode: The flashlight will emit a series of short and long flashes in the universal SOS distress signal pattern (three short, three long, three short flashes), which is commonly used for emergency distress signaling.

Note: To deactivate either the Flash Mode or SOS Mode, simply press the button again to return to the normal light settings or turn the flashlight off.

Safety Precautions

- 1.** This product is equipped with rechargeable lithium batteries. Please ensure that you follow the proper charging guidelines specific to the product model. Improper charging methods can cause significant damage to the battery, potentially resulting in short-circuiting, fire, or even an explosion.
- 2.** When using detachable batteries, be extra cautious to avoid damaging the battery casing. A damaged battery casing can easily lead to a short-circuit or, in severe cases, cause an explosion due to battery leakage.
- 3.** This flashlight can withstand light rain and splashing. However, it is strictly prohibited to submerge the flashlight in water. Water damage can affect the internal components, especially the battery.
- 4.** Always ensure that the flashlight is fully charged before storing it for an extended period. Failure to do so may result in over-discharge, leading to permanent damage to the battery.
- 5.** Never attempt to disassemble the flashlight. Mixing different types of batteries or using incompatible ones can result in malfunction or battery damage.
- 6.** When using the high-powered flashlight, the beam becomes more intense, especially in long-range settings. This is a normal feature of the product, but it is essential to adjust the brightness to a safer level to avoid burns or eye strain.
- 7.** Under no circumstances should you shine the flashlight directly into anyone's eyes, as this can lead to short-term blurred vision or, in extreme cases, cause short-term blindness.
- 8.** Never expose the lamp to fire or extreme heat. Doing so may lead to damage or create a serious safety hazard.
- 9.** Always use the proper USB power adapter and charging cable that are compatible with the lamp. Using an incorrect or faulty adapter may cause serious issues such as electrical leakage, short-circuiting, or even fire.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
