Product Overview

The Porodo LifeStyle LUMALITE 2500 Rechargeable Flashlight combines power, versatility, and convenience in one sleek design. With an impressive 700 meters of coverage, it provides long-range visibility, making it perfect for outdoor adventures, camping, hiking, or emergencies. The 2500 lumens of ultra-bright light ensure that even the darkest environments are well-illuminated, offering superior brightness for any task. Its manual zoom control lets you easily adjust the beam's focus, allowing you to switch between a broad beam to light up large areas or a focused beam for long-distance spotting, giving you the flexibility to adapt to various conditions. Equipped with multi-mode operation, the flashlight offers different lighting modes, including high, medium, and low settings, which not only enhance performance but also help conserve battery life when needed. With an impressive 6-5 hours of continuous working time, the LUMALITE 2500 ensures reliability throughout your activities without the need for constant recharging. Additionally, its rechargeable design means you don't need to worry about replacing batteries, making it both eco-friendly and cost-effective.

Specifications

Input	5V/1A
Battery Capacity	10000mAh
Rated Power	60W
Brightness	2500LM

Distance	700m
Charging Interface	Type-C
Charging Time	10H
Working Time	5.6H
Water-Resistance Level	IPX5
Product Size	43.8 x 71.7 × 293.5mm
Product Weight	836g
Model Number	PDFL5102

Key Features

- 1.700 meters coverage:** The flashlight offers an impressive beam range, allowing you to see clearly up to 700 meters. This makes it ideal for outdoor activities like camping, hiking, or emergencies, providing long-distance visibility in dark environments.
- 2.2500 lumens:** With a 2500-lumen output, this flashlight delivers an ultra-bright beam that ensures superior brightness, illuminating dark spaces efficiently. Whether you're navigating through the wilderness or facing power outages, this intense light ensures you won't be left in the dark.
- 3. Manual zoom control:** The flashlight comes with manual zoom control, which lets you adjust the beam's focus to your preference. You can switch between a wide beam for lighting up large areas or a focused beam for long-distance

spotting, offering flexibility based on your environment.

4. Multi-mode operation: The multi-mode operation allows you to choose from different lighting modes (such as high, medium, and low), depending on your needs. This versatility helps conserve battery life when needed or maximizes brightness for high-performance tasks.

5. Working time: On a full charge, the flashlight can run continuously for 6-5 hours. This extended runtime ensures it's reliable for long-term use during outdoor activities or emergencies, without requiring frequent recharging.

6. Rechargeable: The rechargeable feature makes the flashlight eco-friendly and cost-effective. Charge it via a USB cable, and you won't need to worry about constantly replacing batteries, reducing waste, and saving money over time.

7. The device is housed in a high-strength aluminum alloy shell that is electroplated for enhanced durability. It is lightweight, pressure-resistant, and designed to withstand damage, ensuring long-lasting performance. This device can be charged and discharged over 500 times, offering exceptional longevity and reliability. It also includes a standard charging cable, ensuring safe and convenient charging.

Charging Instructions

1. When charging, avoid using the flashlight while it is connected to the power source, as this can lead to overheating of the LED or internal charging components. The recommended charging time should not exceed 24 hours.

2. During use, if the LED light appears dim, this typically indicates that the battery is nearing depletion and is in a safe discharge state. In such cases, charging should be paused and the flashlight recharged.

Safety Precautions

- 1.** Do not charge the flashlight if the LED light is completely off, as this could signal that the battery is in a vulnerable state, risking damage to both the battery and the device. The flashlight should be recharged regularly, especially if it is not used frequently. If left unused for extended periods, we recommend charging it at least once every three months to maintain battery life.
- 2.** Please ensure that the charging power supply and socket installation comply with all relevant safety regulations. To avoid eye strain or potential injury, do not shine the flashlight directly into your eyes. Children should use the flashlight only under the supervision of an adult to ensure safe operation.
- 3.** Please do not attempt to replace parts or perform repairs on the flashlight without following proper procedures. Unauthorized replacements or modifications may damage the flashlight and void any warranties.
- 4.** Ensure the flashlight is not exposed to water unless it is specifically rated as waterproof. Water damage can cause the flashlight to malfunction or even pose a risk of electrical shock.
- 5.** When not in use, store the flashlight in a dry and safe location, away from extreme temperatures, moisture, or direct sunlight. This helps preserve the flashlight's functionality and prevents battery leakage.
- 6.** Always use the batteries recommended by the manufacturer for optimal performance and safety. Using incorrect or incompatible batteries can cause damage to the flashlight or pose a risk of overheating.
- 7.** Inspect the flashlight for any signs of damage, such as cracks or loose parts, especially after a fall or impact. If damaged, cease use immediately and have it repaired or replaced to avoid further hazards.
- 8.** Flashlights, especially those with rechargeable batteries, should be kept out of reach of children unless they are under supervision. Children may misuse the flashlight, leading to accidents or injuries.
- 9.** Do not leave the flashlight in direct sunlight or near heat sources for extended periods, as this can overheat the device and damage the internal components or battery.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
