## Product Overview

The Porodo Blue Multi-Port Power Hub is a versatile and powerful device designed to meet your charging needs with ease. Featuring a total output power of 3000W and 17W of USB output, this power hub ensures efficient charging for your devices. It is equipped with 2 USB-A ports and 3 Type-C ports, providing a combined USB output of 3.4A for rapid charging. The hub also includes 3 universal AC sockets, allowing for compatibility with a wide range of devices. Additionally, the power hub has a convenient ON/OFF button for easy operation, making it a reliable and user-friendly choice for your power needs. With its universal compatibility, this power hub is perfect for both home and office use.

## Specifications

Rated Current	10A
Rated Power	3000W
Rated Voltage	100-250V
USB Output	5V/3.4A (Max)
Material	Fireproof PC Material

## Product Features

### A. 3000W Total Output Power

This power hub offers a robust 3000W of total output power, providing a strong and stable energy supply to multiple devices. It ensures that your electronics receive the necessary power for optimal performance, even when several devices are plugged in simultaneously.

## **B. 17W Total USB Output**

With a total USB output of 17W, the Porodo Blue Power Hub offers quick charging capabilities. It supports the charging of smartphones, tablets, and other USB-powered devices efficiently, saving you time and ensuring your devices are ready to go when you need them.

## **C. Multiple USB Ports (2 USB-A & 3 Type-C)**

This hub comes with 2 USB-A ports and 3 Type-C ports, offering diverse charging options. Whether you're using older USB-A devices or the latest Type-C gadgets, this hub caters to all your charging needs, ensuring compatibility with a wide range of devices.

## **D. 3.4A USB Output**

The hub delivers a powerful 3.4A USB output, enabling rapid charging of multiple devices at once. This ensures that your devices charge quickly without sacrificing power when you have multiple items connected.

## **E. Universal AC Sockets (x3)**

The Porodo Blue Power Hub includes three universal AC sockets, allowing you to plug in a variety of electrical devices such as laptops, printers, and other household electronics. Its universal compatibility makes it suitable for use with different types of plugs, ensuring versatility across regions.

## **F. ON/OFF Button**

The convenient ON/OFF button allows you to easily control the power flow to the connected devices. You can quickly turn off the power hub when not in use, preventing unnecessary energy consumption and increasing safety.

## **G. 6.6ft / 2m Cable Length**

The power hub is equipped with a 6.6ft (2 meters) long cable, providing extra flexibility in placement. Whether you're using it on a desk, under a table, or across the room, the extended cable length gives you the freedom to position the power hub where you need it most.

# **Safety Precautions**

## **1. Avoid Overloading**

Do not exceed the maximum total output power of 3000W. Overloading the power hub can cause overheating, damage to the hub, or even lead to electrical

hazards. Ensure that the total wattage of connected devices does not exceed the specified limit.

## **2. Use Only with Compatible Devices**

This power hub is designed to work with devices that are compatible with its input and output specifications. Avoid connecting devices that exceed the maximum supported input voltage or amperage to prevent potential damage.

## **3. Keep Away from Water**

The power hub is not water-resistant. Always ensure that it is kept away from water, moisture, and high-humidity environments. Using the hub in wet conditions could result in electrical shock or damage to the device.

## **4. Turn Off When Not in Use**

Always turn off the power hub using the ON/OFF button when not in use to reduce energy consumption and minimize potential fire risks. Additionally, it's advisable to unplug the hub if it will not be used for an extended period.

## **5. Inspect Regularly for Damage**

Periodically inspect the power hub and its cables for any signs of wear, fraying, or damage. Do not use the hub if it shows any visible damage or if the power cord is exposed. Damaged equipment could present a safety risk.

## **6. Use in Dry, Well-Ventilated Areas**

Place the power hub in a dry, well-ventilated area to allow for heat dissipation. Avoid placing it in cramped or enclosed spaces where heat may build up, as this could lead to overheating or fire hazards.

## **7. Do Not Attempt Repairs Yourself**

If the power hub malfunctions, do not attempt to repair it yourself. Seek professional assistance or contact the manufacturer for servicing. Repairing the device improperly could result in further damage or safety hazards.

## FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference; and

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for assistance.

RF warning statement:

The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure conditions without restriction.

## Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

## Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at <https://www.porodo.net/warranty> and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
