Overview

Thank you for purchasing the Juice Mate Portable Juicer. Designed for convenience, this juicer features a 45W motor with 18,000 RPM for efficient blending, allowing you to enjoy fresh juice in just 20 seconds. With a 380 mL capacity and made from food-grade materials, it ensures both safety and high performance. The LED indicator provides easy status monitoring, while Type-C charging makes it convenient for quick recharges. Additionally, the BPA-free construction and SUS 304 stainless steel ensure durability and reliability for long-term use.

Instructions for Use

Before using the juicer cup for the first time, ensure that the built-in battery is fully charged and clean all parts that come into contact with the ingredients.

1. Prepare the Fruit: Cut the fruit into small pieces (approximately 1.5x1.5 cm). Remove the core, thick skin, or hard shell as necessary.

2. Fill the Cup: Add fruit to the cup until it's about 60 % full, then add water until it reaches about 80 % of the cup's capacity.

3. Start Juicing: Place the cup upside down and press the button to start. Afterward, set the cup upright. Gently shake the cup during operation to help the juicer perform more efficiently and enhance the juice's consistency.

4. Power Off: Once the juicing is complete, turn the device off. You can now enjoy your fresh juice.

This model is equipped with a double safety device, and the portable blender will only function after the body has been securely mounted on the base.

Cleaning and Storage

1. Store the juicer in a dry place when not in use for extended periods.
2. Clean the lid, cup body, and base immediately after use. Do not submerge the base part in water. Always turn off the power before cleaning.
3. Avoid placing the juicer in high-temperature sterilization cabinets or dishwashers. Instead, clean it with warm water and a non-abrasive cleaner.

Note

1. Juicing Times:

Apple and Pear Juice: Approximately 45 seconds.

Orange and Strawberry Juice: Between 30 to 45 seconds.

Harder Ingredients may take longer due to the increased power needed.

2. Charging Time: The recommended charging time is 2 to 3 hours.

Attention

1. The device is powered by a DC motor and battery. It is compatible with all standard smartphone chargers. Always use the provided data line for charging. In winter, the recommended charging time is about 8 hours.

2. When the juicer is in operation, do not open the lid or place your hands or any objects inside the cup.
3. Always ensure the juicer is powered off before cleaning. Clean the lid, cup body, and base part separately. Never submerge the base part in water to avoid damaging the electronics.
4. The juicer will stop automatically after 5 seconds of inactivity. The operating time varies, with a maximum of 20-45 seconds depending on the model. Avoid continuous operation for long periods to prevent excessive load on the motor.
5. If the fruit is too large, the motor may overheat and shut down to protect the device. The power will automatically cut off, and the screen will flash. To resume, turn off the device, let it cool down, and restart.
6. Do not place any part of the product in washing equipment such as dishwashers.
7. Avoid using steel wool, abrasive cleaners, or corrosive liquids when cleaning the product.
8. This product is designed specifically for making fresh juice. It is not suitable for mincing meat or grinding nuts, beans, or similar products. Direct grinding of such items may cause product failure and reduce its lifespan.
9. This product should be kept out of the reach of children. It should not be used or played with by individuals who have a physical or mental disability, or a lack of relevant experience or knowledge, including children.
10. This product is intended solely for personal or household use. Any accidents or damages that occur must be repaired by a professional. Do not attempt self-disassembly.
11. The blade of the product is sharp. Please exercise caution when cleaning to avoid injury.
12. The product has a built-in battery that cannot be removed. Please ensure the power is turned off before disposing of the product in a recycle bin.

Specifications

Model No.	GL-JU19
Jar Material	AS
Blade Material	SUS 304
Capacity	380 ml
Battery Capacity	1200mAh
Power	45W
Voltage	3.7V
RPM Speed	18000 RPM
Charging Port	Type-C
Charging Time	2-3 Hrs
Single Blend Time	20 sec
Blending Cycles	10-15 Times
Product Weight	400 g
Product Dimensions	80*238 mm

Troubleshooting

Problem 1: Juicer does not work, indicator light does not turn on

Cause: The juicer has no power.

Solution: Charge the juicer.

Problem 2: Juicer stops during use, indicator light turns red and stays on, then turns off

Cause: The juicer has no power.

Solution: Charge the juicer.

Problem 3: Juicer stops working after 5 seconds, indicator light flashes blue

Cause: The juicer has been idle for 5 seconds and automatically stops to

protect the motor.

Solution: Restart the juicer.

Problem 4: Juicer stops working after 5 seconds, indicator light flashes blue

Cause: The motor is locked due to an obstruction.

Solution: Remove any hard objects that may be blocking the motor.

Problem 5: Juicer does not power on, indicator light flashes red and blue alternately

Cause: The security switch is engaged.

Solution: Reinstall the juicer body and base properly.

Problem 6: Juicer leaks water

Cause: The silicone ring is not properly positioned.

Solution: Correctly install the silicone ring in its proper place.

Problem 7: LED light flashes for an extended period

Cause: The juicer is charging.

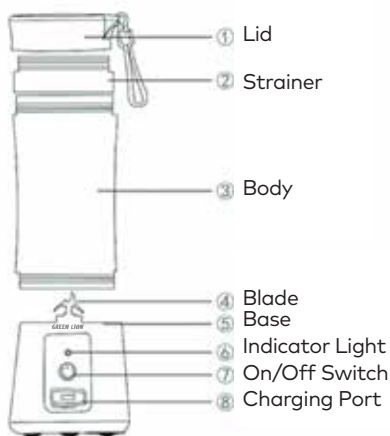

Solution: This is normal during the charging process.

Problem 8: LED light flashes continuously

Cause: The juicer is fully charged.

Solution: This is normal when the juicer is fully charged.
