Product Overview

The Porodo 111W Car Charger is designed to deliver fast and efficient charging on the go. It features dual retractable cables – one Lightning and one Type-C – both 80cm in length, ensuring easy connectivity for various devices. With a maximum output of 111W, it supports simultaneous charging through its PD 45W Type-C port and QC 36W USB-A port. The car charger also includes an LED voltage display, allowing you to monitor the charging status and voltage in real time. Its sleek, compact design makes it easy to store and perfect for travelers who need a reliable charging solution.

Specifications

Model	PDC46P
Input	12-24V
USB-A Output	5V/3A, 9V/3A, 12V/3A, 36W
USB-C Output	5V/3A, 9V/3A, 12V/3A, 36W
USB-A + USB-C Output	5V/3.4A
TYPE-C Cable Output	5V/3A, 9V/3A, 12V/3A, 15V/3A, 20V/2.25A, 45W
Lightning Cable Output	5V/3A, 9V/3A, 12V/2.5A, 30W
Total output	17W+45W +30W = 92W
Max Output	36W + 45W+ 30W=111W

Product Features

1. Max Output of 111W:

This car charger is designed to provide a maximum output of 111W, ensuring that it can quickly charge multiple devices simultaneously. Whether you're charging a smartphone, tablet, or laptop, this charger delivers powerful and efficient performance to keep your devices ready to go.

2. Simultaneous Charging:

With the ability to charge multiple devices at once, this charger ensures you don't have to choose which device to power up first. It supports simultaneous charging across its multiple ports, making it ideal for users who need to charge their phone, tablet, or other tech gadgets while on the road without sacrificing speed.

3. Dual Retractable Cables (Lightning & Type-C):

The charger is equipped with two retractable cables: one Lightning and one Type-C, allowing compatibility with a wide range of devices such as iPhones, Android devices, and other electronics. The retractable design minimizes clutter and ensures the cables remain neat when not in use, enhancing portability.

4. Quick Charge 3.0 (QC 36W):

Supporting Quick Charge 3.0 technology, this charger offers 36W of fast charging power. It ensures that devices equipped with QC 3.0 technology can be charged up to 4 times faster than conventional chargers. This feature is perfect for those who need a quick power boost during short trips.

5. PD 45W Type-C Port:

The 45W Power Delivery (PD) Type-C port provides a high-speed charging solution for devices that support USB Power Delivery. Ideal for charging high-power devices like laptops, tablets, or the latest smartphones, this port offers efficient charging without the usual power delays.

6. LED Voltage Display:

The LED voltage display provides real-time feedback on the charging voltage. This allows users to monitor charging conditions and ensure they're always

using the optimal voltage for their devices, helping to prevent overcharging or power issues.

7. Retractable Cable:

The retractable cables extend up to 80cm, providing enough length to comfortably connect your devices even in large vehicles or in areas where the charging port is a bit farther from the device. When not in use, the cables retract neatly back into the charger, saving space and reducing cable tangles.

Operation Instructions

- 1.** Insert the product into the cigarette lighter port of your vehicle to establish a secure power connection.
- 2.** Plug one end of the charging cable into the USB charging ports of the device. Then, connect the other end to your device to begin charging.
- 3.** Gently extend the retractable USB Type-C or Lightning cable from the device by pulling it. Once extended, plug the appropriate end into your device to start charging.

Safety Precautions

- 1. Vehicle Compatibility:** This product is designed for use in vehicles with a voltage not exceeding 24V. Ensure that the vehicle's cigarette lighter port matches this specification to prevent any damage to the device.
- 2. Avoid Extreme Environments:** Do not use this product in areas with high temperatures or excessive humidity. Prolonged exposure to such conditions can compromise the product's functionality and lifespan.
- 3. Handling and Installation:** Avoid applying excessive force when handling or mounting this product. Do not squeeze, bend, or subject the device to heavy impacts. Proper care during installation will ensure optimal performance.
- 4. Storage:** When not in use, store the product in a dry, cool place away from

direct sunlight and moisture to preserve its quality and prevent any potential damage.

Note: For your safety, always disconnect the product from the power source when not in use for extended periods.

LED Voltage Display

The LED voltage display provides real-time monitoring of your vehicle's battery output, ensuring that you are always aware of its status. The display shows the current voltage of your car's battery and will flash if the voltage is either too high or too low, helping you avoid potential damage to your electrical systems.

a. Normal Voltage Range (12V system): 11.5V to 14.9V

b. Normal Voltage Range (24V system): 23.1V to 27.3V

If the voltage falls outside these ranges, the LED will flash to alert you of an abnormal condition. Regularly checking this display can help prevent issues related to undercharging or overcharging your vehicle's battery.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
