Product Overview

The Powerology AIRWAVE Magnetic Wireless Car Charger offers a seamless and versatile charging solution for your mobile devices on the go. Designed to be both practical and efficient, this charger features dual mounting options, allowing you to securely attach it to either your dashboard or AC vent with a stable suction base. Equipped with Qi2 technology, it supports fast wireless charging, ensuring that your phone powers up quickly and efficiently while you drive. The charger is designed with a powerful magnetic grip that allows for a one-touch snap, ensuring your phone stays securely in place during your travels. With a 360° adjustable viewing angle, you can easily position your phone for optimal visibility, whether you're using it for navigation or calls. The lightweight, compact design makes it easy to install and remove, making it ideal for those on the move. Additionally, the Powerology AIRWAVE is built to be stable and vibration-free, ensuring that your phone remains securely mounted even on bumpy roads. This charger is the perfect solution for drivers looking for a convenient, fast, and reliable charging experience while on the go.

Specifications

Input	5V/2A, 9V/2A, 12V/1.5A, PPS 16-3.3V/2A
Output	For iPhone 15W (Max), For AirPods 5W (Max)

Dimensions	57.6mm diameter x 5.98mm thickness
Weight	69 grams (including cable, without mount)
Material	CNC-machined aluminum alloy (curved edge) + acrylic
Cable Length	1.2 meters

Key Features

- 1. Adjustable Viewing (360°):** The charger offers flexibility with adjustable angles to keep your phone within easy view.
- 2. Powerful Magnetic Grip:** One-touch magnetic snap ensures your phone stays securely mounted during your drive.
- 3. Fast Wireless Charging:** Supports Qi2 fast charging for a rapid, cable-free power-up.
- 4. Lightweight & Travel-Ready:** Compact design allows for easy installation and removal, making it perfect for frequent travelers.
- 5. Stable & Vibration-Free:** Designed for stability, ensuring that your phone stays securely in place even on bumpy roads.

Magnetic Compatibility Guide

Bare Metal
(iPhone 12/13/14/15 series)

1. MagSafe Compatibility iPhones (12-15 series) offer a secure MagSafe connection.

MagSafe Magnetic Phone Case

2. MagSafe Magnetic Phone Case (MagSafe Optimized)

MagSafe cases keep iPhone securely attached to accessories without slipping.

Conventional Phone Case

3. Conventional Phone Case (Weak Magnetic Force)

Non-MagSafe cases weaken the magnetic hold, causing instability.

Charging Instructions

For optimal and safe charging, it is recommended to use a Quick Charge 2.0 or 3.0 wall charger. Other chargers may not provide the necessary power and could result in slower charging or potential device issues.

Safety Precautions

- 1.** Always keep the charger away from water and other liquids to prevent any risk of malfunction or electrical hazards.
- 2.** Avoid placing the charger near magnetic stripes or chip cards (such as ID cards, bank cards, etc.). Proximity to such items may cause magnetic interference, potentially damaging the card or affecting the charger's performance.
- 3.** This charger should not be used with devices that contain metal plates, as it can cause excessive heat buildup. This overheating could lead to damage or even burns on your device.
- 4.** Use the provided plug and USB charging cable for fast charging. Both support QC (Quick Charge) or PD (Power Delivery) fast charging protocols.
- 5.** We recommend using an iPhone 12/13/14/15 series for optimal charging performance. Alternatively, you may use the original iPhone MagSafe magnetic case for these models. Please note that using any other mobile phone case, especially non-MagSafe models, may result in the phone slipping, leading to potential damage. This charger is not recommended for use with devices

outside the iPhone 12/13/14/15 series, as it is not compatible with other phone models.

6. The recommended operational temperature for this wireless charger is 113°F. Although the charger is designed to handle up to 130°F, it's essential to ensure that the temperature remains below the recommended threshold for safe and effective charging. In the event of abnormal heating, the charger will automatically shut off to prevent damage.

7. Before charging, it's recommended to turn off any power-hungry applications on your device to prevent overheating. If the charger reaches a temperature of 113°F, it is normal for the charging speed to slow down as a protective measure.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Powerology** website or shop come with a 24-month warranty.

The 24-month warranty applies to products purchased directly from our **Powerology** website or store. If **Powerology** products are bought from any of our verified retailers, then the product is eligible for only a 12-month warranty. To extend your product's warranty, visit our website **powerology.me/warranty** and fill in your details in the provided form along with an uploaded picture of the product to process your request. Once approved, you will receive a confirmation email of the extended product warranty. Upload the required information within 48 hours of purchase to be eligible for a 24-month warranty period.
