## Product Overview

The Green Lion Everest 10000mAh Power Bank combines cutting-edge technology and convenience. With Qi2.2 25W wireless technology and 45W PD fast charging, it provides fast, efficient power on the go. Featuring a built-in kickstand for hands-free use, this power bank is perfect for those who need both power and portability. Its aluminum alloy design ensures durability, while the dynamic cooling fan keeps it cool during use. The LED display provides real-time battery status, and it is flight-approved, making it a great choice for travel. Additionally, the USB-C port ensures versatile charging options. Whether you're looking to charge your devices wirelessly or via cable, the Green Lion Everest power bank delivers performance and convenience in a compact design.

## Specifications

Model No.	GL-PX93
Material	ABS + PC + Aluminum Alloy
Battery Capacity	10000mAh
USB-C Input	5V/3A, 9V/3A, 15V/3A, 20V/2.25A (PD45W)
USB-C Output	5V/3A, 9V/3A, 15V/3A, 20V/2.25A (PD45W)
Wireless Output	5W/7.5W/10W/15W/25W Max
Product Weight	191.6 g
Product Dimensions	17.9*69*103 mm

## Package Contents

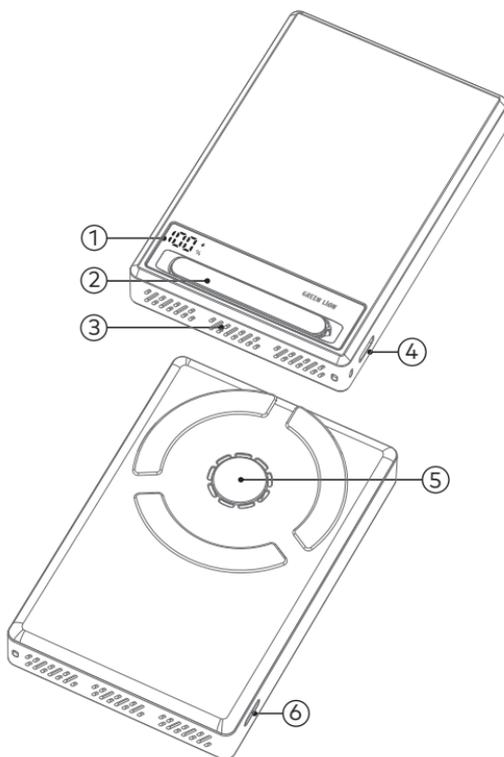

Power Bank

USB Type-C Cable

## Schematic View

1. Power Indicator
2. Stand
3. Heat Dissipation Vents
4. Type-C Input/Output
5. Wireless Charging Area
6. Switch

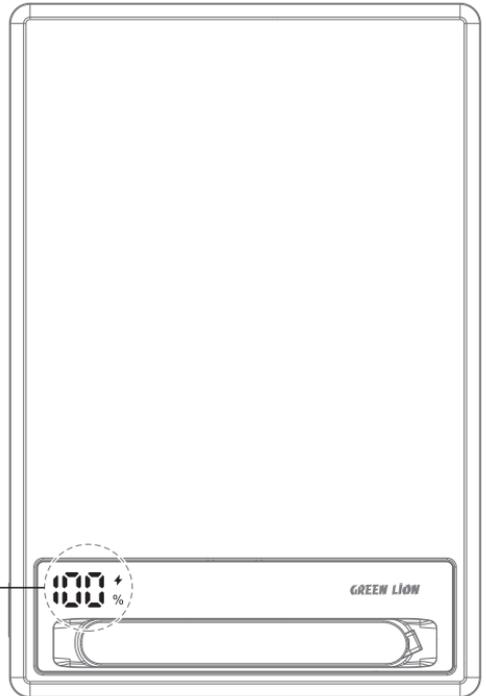

## Digital Display Details

### Digital Display Details

#### Fast Charging Indicator

Fast Charging Mode	⚡ ON
No-Fast Charging Mode	⚡ OFF

Fully Charged	100
Charging	Real-time power
Low Power	Number Flashes

#### Note:

1. If the wireless charging indicator is off, please check for any magnetic or metal objects that may interfere with charging.
2. Wired charging does not display the wireless charging indicator on the screen.

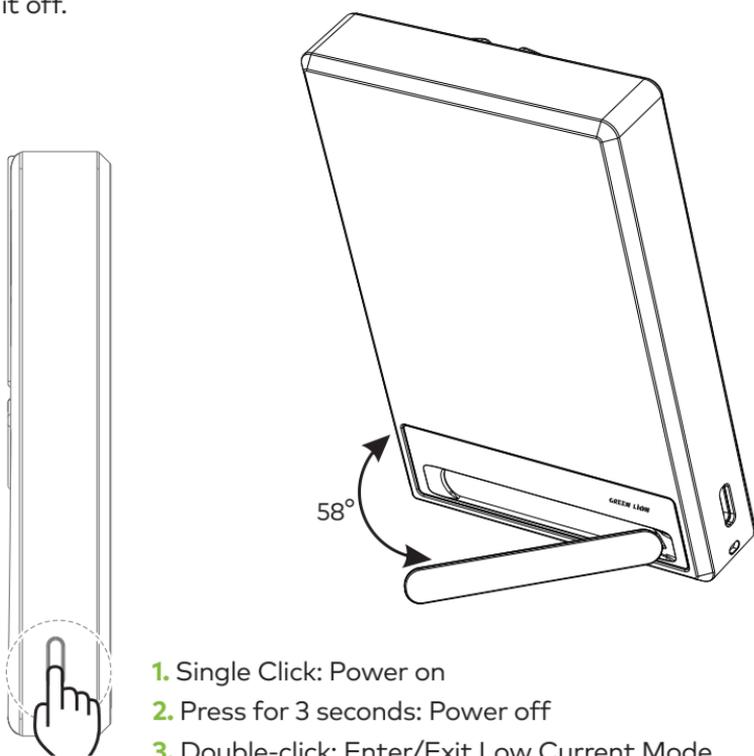

3. When you start charging, the fast charging indicator may take a few seconds to appear as the device transitions into fast charging mode.

4. When the power bank is charging only one device, it supports fast charging. However, when charging two or more devices simultaneously, the maximum output is 5V/3A, and fast charging will not be supported.

## Switch and Stand

The stable stand of this power bank not only allows for adjustable angles, but it can also be folded flat for easy travel. You can adjust the angle (58°) based on your needs.

When your phone does not need to charge, it can be used as a simple MagSafe stand to support the phone. Just double-click the switch to power it off.

### Note:

When charging AirPods or other earbud devices, please switch the charging mode to low current mode. (The USB-C port supports charging devices with a charging current of less than 50mA.) After entering low current mode, the digital tube displays circular and racing patterns. If no operation is performed, it will automatically exit and power off after 5.5 to 6 hours.

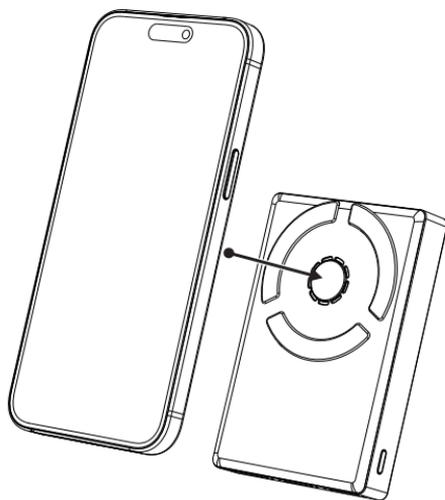

## Usage Instructions

Simply attach the product to the back of your iPhone (12-17 and later models) or AirPods 3, or to any other wireless charging-compatible phone with a MagSafe-compatible ring. The device will automatically begin charging via the built-in magnetic wireless charging feature, with a maximum output of 25W.

### Note:

The magnetic wireless power bank is primarily designed for use with iPhone 12-17 and subsequent models, or any phone with a MagSafe-compatible ring. It can also be used with AirPods 3.

If your phone does not have a MagSafe case, please charge it via the Type-C output port.

## Charging the Power Bank

Please recharge the product when the power or battery is low.

1. Using the included cable, connect the Type-C connector to a QC/PD adapter and the Type-C connector to the input connector of the power bank.

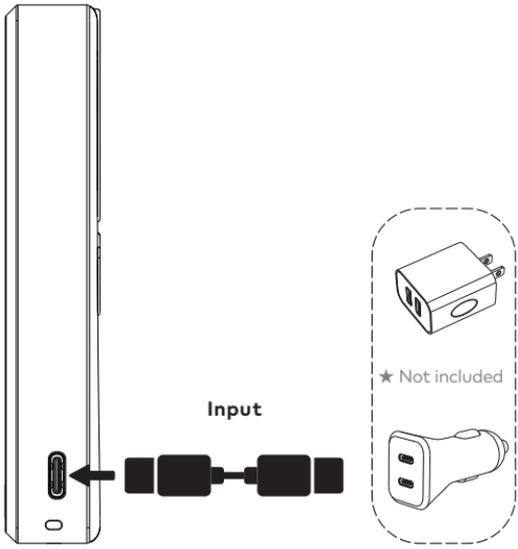

2. During charging or when fully charged, the battery power LED indicator will display the current charging status with specific figures.

### Pass-Through Charging

You can place your iPhone 12-17 or later models, and AirPods 3, on the wireless charging area and connect the power bank to a power source (PD or QC adapter). This will allow the power bank to charge itself while simultaneously charging your iPhone 12-17/AirPods 3.

### Note:

While pass-through charging, the phone will charge quickly, but the power bank will charge slowly. Once the phone is fully charged, the power bank will switch to fast charging mode.

### Note:

When the power bank is charging only one device, whether through the Type-C port or the wireless charging area, it supports fast charging. However, if two devices are being charged simultaneously, the maximum output power is 5V/3A, and fast charging will not be supported.

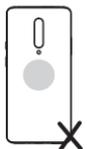

## Precautions

1. Do not drop, misuse, or apply excessive force to your power bank. Power banks contain batteries and circuit boards with delicate components that can be damaged if mishandled.
2. If your power bank swells or bulges, stop using it immediately and dispose of it properly.
3. Store your power bank in a cool, dry place. Do not store it in hot or humid environments.
4. All power banks include safety features to cut off power in case of overcharging or overheating.
5. When charging a device, the power bank may become warm. This is normal and should not be a cause for concern.
6. It's normal for both the charger and your smartphone to become hot during use, especially when charging and using the device simultaneously (e.g., playing music).
7. In normal conditions, battery performance may decline over time, typically after several years of use.

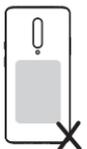

### Notice:

When your wireless power bank is not functioning properly:

- a. Ensure there are no obstructions on the wireless power bank, such as magnets, metal objects, credit cards, or other foreign objects.
- b. If the wireless power bank is overheating, remove your mobile device from the charging area. The power bank will stop charging automatically to prevent further overheating. Please wait for the power bank to cool down before attempting to charge again.

Magnets

Credit Cards

Metal Cases

## FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference; and

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for assistance.

RF warning statement:

The device has been evaluated to meet general RF exposure requirements.

The device can be used in portable exposure conditions without restriction.

## Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

## Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at <https://www.greenlion.net/warranty> and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.

For more info, please check:
