Product Overview

The Green Lion Barq Insect Killer is an effective solution for keeping your surroundings free from mosquitoes and other flying insects. It features a 360° mosquito trap that ensures full coverage, capturing insects from every angle. With a protective safety grille, it is designed to keep users safe during operation, while the easy-to-clean tray allows for hassle-free maintenance. The device also includes a timed auto shut-off function, ensuring energy efficiency and convenience. Its low-noise operation guarantees a quiet environment, and the long-lasting UV lamp emits 365nm light to attract insects effectively. The 3500V high-voltage design ensures that insects are swiftly eliminated. It covers an area of up to 100m², making it suitable for both small and larger spaces. Additionally, the Green Lion Barq Insect Killer is child-safe, featuring a safety grille to prevent any accidents. The product is powered by a 20W lamp and comes with an IR remote control for easy operation. This insect killer is built for durability, providing a long-lasting solution to insect problems.

Specifications

| | |
|-----------------------|-------------------|
| Model No. | GL-1K35 |
| Material | ABS + Steel |
| Rated Voltage | AC 220-240V |
| Rated Frequency | 50Hz |
| Electric Grid Voltage | 3200-3500V |
| Rated Power | 20W |
| Effective Coverage | 100m ² |
| Lamp Tube | T8 F10W |

| | |
|--------------------|---------------------|
| Power Cord | 3-Pin UK Plug, 1.3m |
| Product Weight | 1.7 kg |
| Product Dimensions | 92*260*393 mm |

Safety Instructions

1. This product is for indoor use only.
2. Not suitable for use in barns, stables, or similar environments.
3. Do not use in areas where flammable vapors or explosive dust may be present.
4. Children should be supervised when using the appliance to ensure safety.
5. Use only with the power supply unit provided with the appliance.
6. Do not use in flammable areas.
7. Do not clean the product with water, as it may cause circuit damage.
8. Turn off the power switch when not in use for extended periods.
9. To avoid interference from other light sources (e.g., fluorescent lights, TVs, outdoor lights), turn them off when the device is operating. Additionally, avoid direct wind from fans or air conditioners, and use the device in a closed environment for optimal performance.
10. Keep the device out of the reach of children while in use. Avoid inserting fingers or metal objects into the machine to prevent accidents.
11. Do not remove the mosquito box while the machine is operating.
12. Turn off the power switch before cleaning the mosquito box to avoid accidents.
13. This product is not intended for use by individuals (including children) who are physically weak, slow, mentally impaired, or lack experience or knowledge, unless supervised by responsible persons ensuring their safety.
14. For product faults, please seek professional maintenance or contact the manufacturer.

15. Before cleaning the product, ensure the power supply is turned off to prevent electric shock.
 16. Never flush the machine directly with water to avoid damage.
 17. If the power cord or main engine is damaged, replace the power line immediately to avoid danger.
 18. If the lamp shows signs of aging or flickering continuously, it must be replaced by a professional. Non-professionals should not replace the lamp tube or tamper with the circuit board.
 19. A high voltage warning icon is displayed on the nameplate.
 20. Danger arises from the harm caused by electric current, as the human body's resistance is insufficient to withstand the damage caused by high voltage and high current.
- Warning:** When the machine is operating normally, there is no electric shock hazard when the human body comes into contact with the outer protective mesh of the product. However, it is prohibited to use wet hands to touch the outer protective mesh or to use metal conductive objects to contact the internal electrical network, as this could result in electric shock.

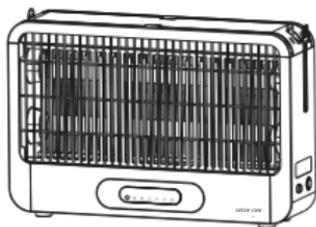

Cleaning and Maintenance

1. During the mosquito season, please ensure that the product is cleaned at least once a week.
2. Always turn off the power and unplug the device before cleaning.
3. Please do not wash the product with water, as it may cause damage.
4. Before removing the protective cover, use a metal screwdriver with an insulated handle to short the power grids and discharge any remaining electricity. After discharging, remove the screw and protective cover. Clean the high-voltage network and lamp tube with a brush.

Key Features

1. The product uses high-voltage electric shock to kill mosquitoes.
2. The shell is made of high-quality, durable ABS material.
3. The 365nm wavelength UV lamp provides high mosquito-killing efficiency and long life.
4. The 360-degree mosquito trap design ensures high mosquito efficiency.
5. The bottom storage box is easy to disassemble and clean.
6. The humanized design of the external grille prevents fingers from extending through to ensure the safety of users, especially children.

Package Contents

Mosquito Killer x1

Brush x1

Remote Control x1

Usage Instructions

1. Plug the product's power cord into a socket with AC220-240V/50Hz.
2. After switching on the power, place the product in a location where children cannot reach it.
3. For better mosquito attraction, close the doors and the windows and turn off the lights and other equipment after turning on the mosquito killer.
4. To avoid disturbance from body odors, it is recommended to reopen the room after 2 minutes.

5. It is suggested to frequently replace the mosquito lamps to effectively exterminate mosquitoes that are hiding in room corners.
6. According to mosquito behavior, place the mosquito killer in a dark, sheltered corner.
7. It is recommended to place mosquito killers at a height of 80-180 cm.
8. Drill a 6mm hole in the wall 1.8m above the ground, secure the screw, then attach the chain hook to the hooks on both sides of the product, and hang it on the wall (Fig.1).

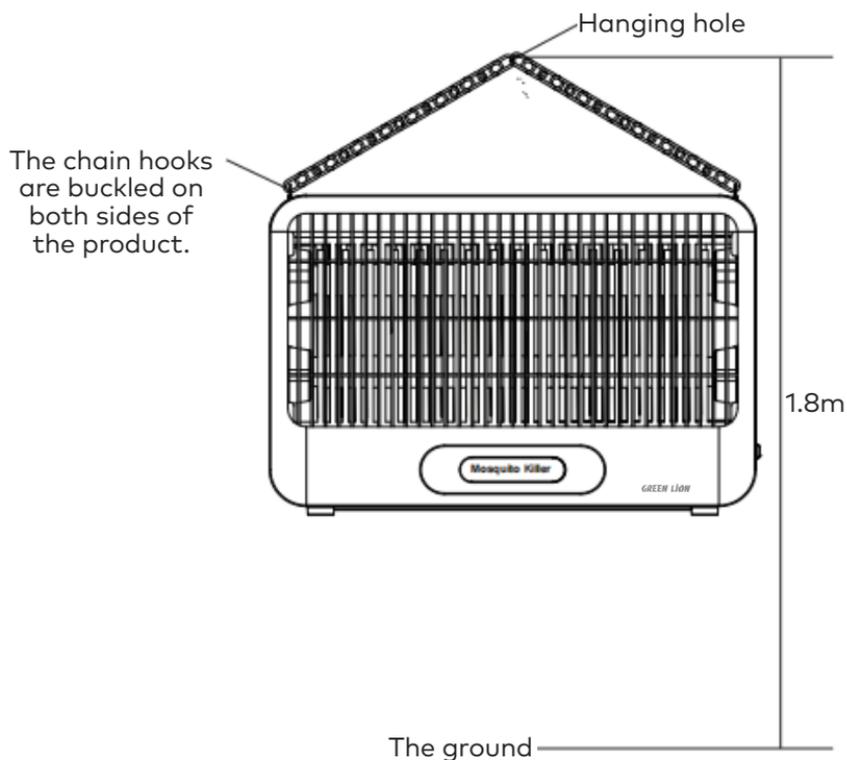

Figure-1

9. The mosquito tray is on the left side of the product. Pull it out to clean it (Fig.2).

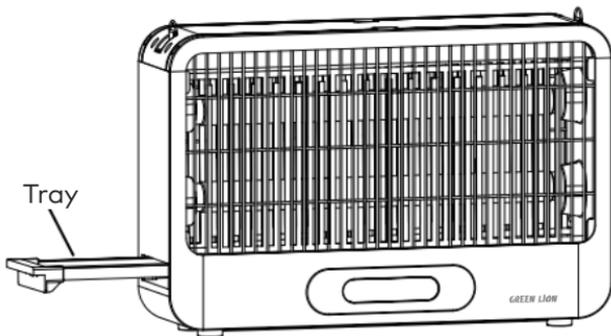

Figure-2

10. The remote control has an effective range of 4-5 meters.

11. The control panel includes:

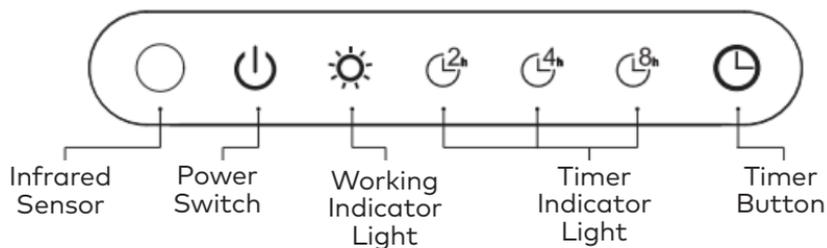

- a.** Power switch
- b.** On/Off key
- c.** Timing key

12. The indicator function: blue light indicates the working state, white light indicates the timing state, with options for 2h, 4h, or 8h.

13. When the power switch is on, all indicator lights will be off. Press the power button, and the blue indicator light will turn on. For long-time operation, press the shutdown button, and the blue light will turn off, stopping the device.

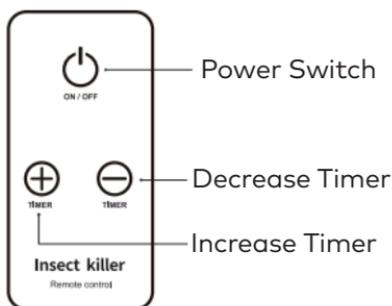

14. In the power-on state, press the timing key to activate the timing shutdown function. Each time you press the timing key, the time increases by 2 hours, up to 14 hours. In the working state, the blue light will be on, and the corresponding timing white light will be on for a long time. When the set time is up, the device stops working, and all indicator lights turn off.

15. In the shutdown state, press the timing key to activate the appointment start function. Each time you press the timing key, the appointment time increases by 2 hours, up to 14 hours. In the reservation state, the blue light will go off, and the white light corresponds to the appointment time. After the timing is completed, the machine will start

automatically and enter long-term working mode with the blue light on and the white light off.

16. Schematic diagram of the switch button. (See Fig. 3)

17. Remote Control Buttons

Troubleshooting

1. Problem: Unable to start the product

Reason: No power

Possible Solution: Check the power supply and plug it in again.

2. Problem: The light tube is not bright

Reason:

- a. Lamp tube damage
- b. The inner wiring is not in good contact
- c. PCB damage

Possible Solution: Return to the original factory

3. Problem: The mosquito-killing effect is not good.

Reason: The lamp tube has exceeded its optimal usage time

Possible Solution: Return to the original factory

4. Problem: The remote control cannot operate the machine

Reason:

a. The power switch of the machine is not turned on

b. The battery of the remote control is out of power

c. The operation distance is too far, or it is not aimed at the receiving port

Possible Solutions:

a. Turn on the power switch

b. Replace the battery or reinstall the battery

c. Use the remote control within 8 meters and aim it at the product's receiving port

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.greenlion.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
